Taylor, 1996 This introduction to the often mathematically rigorous techniques and applications of management science is designed to make the subject accessible for students with no mathematical background or skills It focuses on management science not only as a collection of techniques and processes but as a philosophy and method for approaching problems in a logical manner as skill that is applicable across disciplines and endeavours in all types of jobs and organizations The author's perspective is contemporary his approach hands on and his pedagogy abundant supportive and user friendly for students and instructors alike

Forthcoming Books Rose Arny, 2003-12 Technical Briefing Mansooreh Mollaghasemi, Julia Pet-Edwards, 1997 Presents more than a dozen different methods for solving multiple criteria decision problems Each method is briefly described and illustrated and provides at least one application from the literature

This briefing will provide you with some ideas of how the methods work and illustrate the usability of these methods in real decision problems. The first four chapters show you how the multiple criteria methods differ by the type of problem they are designed to solve, the timing of decision maker information, the type of information required from the decision maker, and the availability of supporting software. The last chapter provides further discussions and comparisons that guide you in making the appropriate choice and in the use of various multiple criteria methods.
