Introductory Mathematical Analysis Haeussler:

Introductory Mathematical Analysis for Business, Economics, and the Life and Social Sciences, Global Edition

Ernest Haeussler, Richard Paul, Richard Wood, 2021-07-26 This title is a Pearson Global Edition. The Editorial team at Pearson has worked closely with educators around the world to include content which is especially relevant to students outside the United States. This book is ideal for one or two semester or two or three quarter courses covering topics in college algebra, finite mathematics and calculus for students in business, economics and the life and social sciences. Introductory Mathematical Analysis for Business, Economics and the Life and Social Sciences provides a mathematical foundation for students in a variety of fields and majors. Haeussler, Paul and Wood establish an emphasis on algebraic calculations that sets this text apart from other introductory applied mathematics books. Because the process of calculating variables builds skills in mathematical modeling, this emphasis paves the way for students to solve real world problems that use calculus. The book's comprehensive structure covering college algebra in Chapters 0 through 4, finite mathematics in Chapters 5 through 9 and calculus in Chapters 10 through 17 offers instructors flexibility in how they use the material based on the course they are teaching, the semester they are at or what the student's background allows and their needs dictate. MyLab Math is not included. Students if MyLab Math is a recommended mandatory component of the course, please ask your instructor for the correct ISBN. MyLab Math should only be purchased when required by an instructor. Instructors contact your Pearson representative for more information.
