**I** was born in the Rotunda Hospital on June 24th, 1932. There were nine children before me and twelve after me, so I myself belong to the middle group. Out of this total of twenty-two, seventeen lived, but four died in infancy, leaving thirteen steel to hold the family fort.

Mine was a difficult birth. I am told, both mother and son almost died. A whole army of relations queued up<sup>1</sup> outside the hospital until the small hours of the morning, waiting for news and praying fervently that it would be good.

After my birth mother was sent to convalesce for some weeks and I was kept in the hospital while she was away. I remained there for some time, without name, for I wasn't baptised until my mother was well enough to bring me to church.

It was mother who first saw that there was something wrong with me. I was about four

months old at the time. She noticed that my head had a habit of falling backward whenever she tried to feed me. She attempted to correct this by placing her hand on the back of my neck to keep it steady. But when she took it away back it would drop again. That was the first warning sign. Then she became aware of other defects as I got older. She saw that my hands were clenched nearly all of the time and were inclined to tense behind my back, my mouth couldn't grasp the top of the bottle because even at that early age my jaws would either lock together tightly, or they would suddenly become limp and fall loose, dragging my whole mouth to one side. At six months I could not sit up without being a mountain of pillows around me; at twelve months it was the same.

1. my hands . . . dragging my whole mouth to one side. Characteristic behaviour of a person with severe cerebral palsy, a condition sometimes caused by lack of oxygen to the brain during birth. In other cases it is a result of a difficult childbirth.

1. queued (pushed) up behind a line of people.
