Education and Natural Disasters David Smawfield,2013-03-28 What is the relationship between education and natural disasters Can education play a role in ameliorating and mitigating them preparing people in how to respond and even helping to prevent them If so how Drawing on research carried out in a number of different countries including Australia China India Japan the UK and the USA the contributors consider the role of education in relation to natural disasters The case studies expand conceptual and empirical understandings of the understudied relationship between education and natural disasters and uncover the potential and the limitations of education for mitigating responding to and potentially preventing natural disasters The contributors also consider the extent to which so called natural disasters such as mudslides caused by deforestation and flooding areas built on known flood plains are linked to human behaviour and how education can impact on these

International Perspectives on Natural Disasters: Occurrence, Mitigation, and Consequences

Joseph P. Stoltman,John Lidstone,Lisa M. DeChano,2007-03-01 Reports of natural disasters fill the media with regularity Places in the world are affected by natural disaster events every day Such events include earthquakes cyclones tsunamis wildfires the list could go on for considerable length In the 1990s there was a concentrated focus on natural disaster information and mitigation during the International Decade for Natural Disasters Reduction IDNDR The information was technical and provided the basis for major initiatives in building structures designed for seismic safety slope stability severe storm warning systems and global monitoring and reporting Mitigation or planning in the event that natural hazards prevalent in a region would suddenly become natural disasters was a major goal of the decade long program During the IDNDR this book was conceptualized and planning for its completion began The editors saw the need for a book that would reach a broad range of readers who were not actively or directly engaged in natural disasters relief or mitigation planning but who were in decision making positions that provided an open window for addressing natural disaster issues Those people were largely elected public officials teachers non governmental organization staff and staff of faith based organizations Those people for the most part come to know very well the human and physical characteristics of the place in which they are based With that local outreach in mind the editors intended the book to encourage readers to 1

Handbook of Hazards and Disaster Risk Reduction

Ben Wisner,JC Gaillard,Ilan Kelman,2012-03-29 The Handbook provides a comprehensive statement and reference point for hazard and disaster research policy making and practice in an international and multi disciplinary context It offers critical reviews and appraisals of current state of the art and future development of conceptual theoretical and practical approaches as well as empirical knowledge and available tools Organized into five inter related
