Integrative Document & Content Management Len Asprey, Michael Middleton, 2003-01-01
Portals present unique strategic challenges in the academic environment. Their conceptualization and design requires the input of campus constituents who seldom interact and whose interests are often opposite. The implementation of a portal requires a coordination of applications and databases controlled by different campus units at a level that may never before have been attempted at the institution. Building a portal is as much about constructing intra-campus bridges as it is about user interfaces and content. *Designing Portals: Opportunities and Challenges* discusses the current status of portals in higher education by providing insight into the role portals play in an institution's business and educational strategy by taking the reader through the processes of conceptualization, design and implementation of the portals in different stages of development at major universities and by offering insight from three producers of portal software systems in use at institutions of higher learning and elsewhere. *Lean Six Sigma Using SigmaXL and Minitab* Issa Bass, Barbara Lawton, 2009-01-05

to helping business leaders transform their companies by turning their strategic vision into portfolios of successful projects. Now Petersen shares his winning method with you. Transforming Project Management takes you beyond envisioning a great strategy and into the realm of implementing it with skill, care, and expertise. Petersen explains how to break down a strategic plan into key objectives and project portfolios to make sense of all the project parts, then successfully lead the execution of the plan. You'll learn how to evaluate where you are versus where you want to be, develop plans to move your vision forward, translate strategic plans into action plans with tangible efforts, budgets, and schedules, and guide and inspire the individuals and teams tasked with implementing their plans. Knowing precisely how much a major project will cost before it begins and having processes and tools to monitor how well it's meeting benchmarks along the way should be standard business practice. Clearly, it's not. With Transforming Project Management, you have everything you need to tie strategic planning directly to project management and lead your company to the head of your industry.
