Publisher's description

The Art of Ballpoint Matt Rota, 2015-12 Explores the work methods and themes of leading contemporary artists

The Emergence of Chinese Avant-Garde Art Min'an Wang, Xiaoping Song, 2024-09-01 This book provides a historical analysis of the avant garde art movement in China in the 1980s. This art movement is the product of China's reform and opening up during which time a small number of Chinese artists understood the western modernist art movement and they started their avant garde art experiment in combination with the actual situation of China. This avant garde art experiment completely broke all the artistic styles in Chinese history and it caused a huge shock. After about a decade of radical attempts, it began to form its own position in China. This book discusses its birth, background, its dominant artists and works, its theme and interest, and its final decline. This is not only a work of art history but also a work of cultural history with strong sociological analysis. This book is beautiful in writing, detailed in analysis, and highly readable. It is a very suitable book for those who want to know avant garde art and Chinese since the 1980s.

Finding Your Creative DNA Linda Conway Correll George, Arpan Yagnik, 2025-06-23 This book enables readers to discover their inner creative DNA by providing a strong dose of the four elements of the Creative Matrix: Interrogation, Information, Interpretation, and Inspiration. Creative Aerobics (CA) generates a personal ideation system that produces creativity on demand (COD) and that arrives at multiple solutions in less than an hour in a relaxing and enjoyable way. The strength of the volume lies in its ability to move readers past the conventional and time-consuming 20th century ideation. It helps develop an individual personal approach to their creative DNA by introducing increasingly complex word exercises that strengthen left brain problem solving and increase right brain discoveries. It teaches, encourages, and integrates all aspects of CA to develop the mental muscle that fuels readers' paths to creative accomplishment. By taking CA step by step, readers develop a comfort level knowing they will always be able to come up with ideas. This book will be useful to students, young professionals, and senior leaders looking for the inside track to their creativity. It will also be an invaluable daily practice and interesting read for all students taking general education courses, especially those opting for integrative learning courses which are becoming more prevalent across universities worldwide.
