Data Structures & Other Objects Using Java Michael Main,2003 This book takes a gentle approach to the data structures course in Java It offers an early self contained review of object oriented programming and Java to give students a firm grasp of key concepts and allows those experienced in other languages to adjust easily The book also offers a flexibility which allows professors such options as emphasizing object oriented programming covering recursion and sorting early or accelerating the pace of the course This title meets the needs of professors searching for a book to balance the introduction of object oriented programming and data structures with Java The new edition has been updated to cover Java 1 3 and includes new appendices with more reference material on such topics as Java collections It also features increased coverage of object oriented programming and inheritance New exercises on radix sort and shell sort have also been added

*Data Structures in Java* Thomas A. Standish,1998 Using Java TM 1 1 Professor Thomas A Standish teaches the fundamentals of data structures and algorithms With this exciting new language Standish takes a fresh look at the subject matter New challenges arise any time a new language is used and the author meets these challenges For example although

Java is a language without explicit pointers this book offers pointer diagrams to help students visualize reason about and understand this major Data Structures topic Standish's clear presentation helps readers tie the many concepts of data structures together with recurring themes Central ideas such as modularity levels of abstraction efficiency and tradeoffs serve as integrators in the book in order to tie the material together conceptually and to reveal its underlying unity and interrelationships Highlights Reviews the fundamentals of object oriented programming and Java in Chapter 2 and Appendix A allowing students with no prior knowledge of Java to get up and running quickly Creates a Java applet with a simple GUI in Chapter 2 Covers recursion early and carefully in Chapter 4 to help students grasp this challenging concept Includes an introduction to modularity and data abstraction concepts in Chapter 5 and coverage of key software engineering concepts and skills in Appendix C Contains common pitfall sections at the end of each chapter to help students recognize and avoid potential dangers Instructor's materials are available from your sales rep If you do not know your local sales representative please call 1 800 552 2499 for assistance or use the Addison Wesley Longman rep locator at <http://hepgawl.com/replocator> 020130564XB04062001 *Java Electronic Commerce Sourcebook* Cary A. students with the details of Java's Abstract Windowing Toolkit (AWT). To overcome this dilemma, the text comes with a software package BreezySwingO which simplifies the programming of GUIs. BreezySwing insulates students from the complex details of laying out window components and responding to interface events. Lambert and Osborne's book and software package enable students to enjoy the excitement of writing GUI-based programs without being overwhelmed by or distracted from the more basic issues of algorithm design and the factoring of programs into classes. The University Edition of Borland's JBuilder 4 is packaged with the text *College Mathematics for Business, Economics, Life Sciences and Social Sciences* by Raymond A. Barnett, Michael R. Ziegler, and Karl Byleen, 2008. Designed to be accessible, this book develops a thorough functional understanding of mathematical concepts in preparation for its application in other areas. Concentrates on developing concepts and ideas followed immediately by developing computational skills and problem solving. Features a collection of important topics from mathematics of finance, algebra, linear programming, probability, and descriptive statistics with an emphasis on cross-discipline principles and practices. For the professional who wants to acquire essential mathematical tools for application in business, economics, and the life and social sciences. **Tropical Soil Forming Processes and the Development of Tropical Soils** by Edward Carl Julius Mohr, 1930.
