Cognitive Radio Papers With Matlab Code:

Quantitative Analysis of Cognitive Radio and Network Performance Preston Marshall, 2010 Cognitive radio a paradigm for wireless communication in which either a network or a wireless node changes its transmission or reception parameters to communicate more efficiently and avoid interference is one of the most exciting emerging fields in communications technology Taking an integrated development approach this cutting edge book provides you with clear methods for performing quantitative analysis of cognitive radio techniques in a variety of environments This detailed reference presents a quantitative structure that helps you determine the capability of cognitive radio to address a number of constraints of current radio design Critical to understanding the operation of cognitive radio the book develops an analytic model for a range of spectrum environments Moreover this unique resource offers you unique insight into the application of dynamic spectrum access DSA to improve the performance of all classes of wireless devices DVD Included Contains sample cognitive radio environments and closed form approximations of these environments in MATLAB file format This data enables you to reproduce the analysis provided in the book perform the exercises in each chapter and extend the work through independent investigation and research

Compressed Sensing & Sparse Filtering Avishy Y. Carmi, Lyudmila Mihaylova, Simon J. Godsill, 2013-09-13

This book is aimed at presenting concepts methods and algorithms able to cope with undersampled and limited data One such trend that recently gained popularity and to some extent revolutionised signal processing is compressed sensing Compressed sensing builds upon the observation that many signals in nature are nearly sparse or compressible as they are normally referred to in some domain and consequently they can be reconstructed to within high accuracy from far fewer observations than traditionally held to be necessary Apart from compressed sensing this book contains other related approaches Each methodology has its own formalities for dealing with such problems As an example in the Bayesian approach sparseness promoting priors such as Laplace and Cauchy are normally used for penalising improbable model variables thus promoting low complexity solutions Compressed sensing techniques and homotopy type solutions such as the LASSO utilise l1 norm penalties for obtaining sparse solutions using fewer observations than conventionally needed The book emphasizes on the role of sparsity as a machinery for promoting low complexity representations and likewise its connections to variable selection and dimensionality reduction in various engineering problems This book is intended for researchers academics and practitioners with interest in various aspects and applications of sparse signal processing

Emerging Communication Technologies Based on Wireless Sensor Networks Mubashir Husain Rehmani, Al-Sakib Khan Pathan, 2016-04-05 This book fills a gap in the existing literature by combining a plethora of WSN based emerging technologies into a single source so that reviewers can form opinions regarding these technologies It presents different types of emerging communication technologies based on WSNs and describes how wireless sensor networks can be integrated with other communication technologies It covers many of the new techniques and demonstrates the application of WSNs The book is composed of 14 chapters divided into four parts Identification of emotions through EEG: Elicitation protocols, mapping methods, signal processing and classification strategies, applications Giuseppe Placidi, Daniela Iacoviello, 2023-03-13

Channel Sensing in Cognitive Radio by Using MATLAB. N. Krishna Chaitanya, Bimal Bhattarai, Ashok Subedi, 2018 The development in wireless communication along with various applications has put so many limitations on the use of radio spectrum When we look at spectrum utilization most of the times the radio spectrum is not used properly Some of the frequency bands in the spectrum are unoccupied some frequency bands are less occupied and a few bands are heavily occupied Cognitive radio is the novel concept which can successfully deal with the growing demand and scarcity of wireless spectrum by effectively utilizing the unoccupied frequency bands Cognitive radio is an intelligent wireless architecture which searches the spectrum holes and allows unlicensed users to access licensed spectrum bands Spectrum sensing is used to detect the spectrum holes providing high spectrum resolution capability We have generated an experimental model of cognitive radio system using MATLAB In this paper we delve into the idea of simulating cognitive radio system for effective utilization of vacant frequency bands The performance of cognitive radio has been tested using MATLAB R2012a

Cognitive Radio Communication Experiments using MATLAB Dr. O. P. Meena,2023-07-28 This book is a manifestation of our passion for cognitive radio and our commitment to fostering a deeper understanding of this ground breaking technology With the advent of cognitive radio the dream of achieving spectrum efficiency and coexistence in increasingly crowded radio frequency bands has become a reality In this book I aim to empower students researchers and industry professionals with the knowledge and skills to navigate

Adaptive Weighting of Multi-taper Spectrum Sensing in Cognitive Radio Networks ,2020-03-18 Master s Thesis from the year 2019 in the subject Mathematics Applied Mathematics grade Master Degree language English abstract This thesis discusses the performance enhancement of multi taper spectrum sensing as a powerful technique for cognitive radio networks In multi taper spectrum sensing regular detection of unused spectrum holes is performed to make cognitive radio networks aware of users ctivities As a result more effective spectrum management is expected and unlicensed users could use unused spectrum holes In this thesis an analytical study was proposed in which reliable simple and computationally efficient mathematical expressions for the mean and variance of the probability density function PDF of the multitaper spectrum sensing techniques were derived The proposed analytical study was evaluated by intensive simulations using MATLAB The presence of Additive White Gaussian Noise is assumed Many important aspects of spectrum sensing in cognitive radio networks are included such as receiver operating characteristics detection rate versus signal to noise ratio SNR and the minimum required sample points for a specific performance All simulations were performed to include most factors affecting the efficiency of the proposed sensing methodology such as number of tapers K number of sample points N and the probability of false alarm P_f A comparison with energy detection method was done All simulation results and comparisons confirm that the proposed model is reliable and robust under all factors considered in the simulation
