Nowlan,2017-05-13 The original title for this work was Mathematical Literacy What Is It and Why You Need it The current title reflects that there can be no real learning in any subject unless questions of who what when where why and how are raised in the minds of the learners The book is not a mathematical text and there are no assigned exercises or exams It is written for reasonably intelligent and curious individuals both those who value mathematics aware of its many important applications and others who have been inappropriately exposed to mathematics leading to indifference to the subject fear and even loathing These feelings are all consequences of meaningless presentations drill rote learning and being lost as the purpose of what is being studied Mathematics education needs a radical reform There is more than one way to accomplish this Here the author presents his approach of wrapping mathematical ideas in a story To learn one first must develop an interest in a problem and the curiosity to find how masters of mathematics have solved them What is necessary to be mathematically literate It s not about solving algebraic equations or even making a geometric proof These are valuable skills but not evidence of literacy We often seek answers but learning to ask pertinent questions is the road to mathematical literacy Here is the good news new mathematical ideas have a way of finding applications This is known as the unreasonable effectiveness of mathematics *Tangram Fury Utah Book* Doug Nufer,2017-12-02 Tangrams are ancient Chinese ingenious puzzles They are deceptively simple in design yet can stump even the most seasoned of puzzlers Then the light clicks on and the answer suddenly seems so obvious It s amazing that so many puzzles can be solved with the exact same 7 shapes The State of Utah earned the nickname of the crossroads of the West because so many people journeyed through it on their way to California Oregon or elsewhere It s dry climate and high Rocky Mountains helps it produce powdery snow that s ideal for skiing and giving rise to the claim of the greatest snow on earth Utah was settled by pioneers and is home to a host of interesting sites and activities With over 11 000 miles of rivers and streams plenty of trails through mountains and valleys and awe inspiring sandstone cliffs arches hoodoo and slot canyons there is plenty to see and do This book pays tribute to many of these with original designs that will surely both puzzle and delight Following a brief introduction to tangrams the main portion of the book provides challenging or whimsical puzzles to solve The book is arranged to show a silhouetted puzzle followed by its solution This is followed by tidbits and trivia about tangrams and some famous people who have tinkered with tangrams over the years It also provides some tips and suggestions for those with a competitive streak The text sections of the books in this series are essentially the same but the heart of the book the part that includes the tangram puzzles remains unique Most of the puzzles have been designed by the author Doug Nufer This book series was featured on the NewsWatch TV program on Discovery Channel <http://newswatchtv.com> 2015 12 18 tangram fury Go on What are you
