

16 TYPES OF CYBERSECURITY

1. Network Security

- Protects networks from unauthorized access and threats.
- Examples: Firewalls, VPNs, IDS/IPS

2. Cloud Security

- Secures data and apps in cloud environments.
- Examples: Data encryption, Access controls, CSPM, CWPP

3. Application Security

- Prevents vulnerabilities in software and applications.
- Examples: Secure coding, Pen testing, WAFs

4. Endpoint Security

- Secures devices like computers and smartphones.
- Examples: Antivirus, EDR, DLP

5. Data Security

- Protects sensitive data from breaches and misuse.
- Examples: Encryption, Masking, Access controls

6. Identity & Access Management (IAM)

- Manages who has access to what.
- Examples: MFA, RBAC, PAM

7. Mobile Security

- Defends smartphones and tablets from threats.
- Examples: MDM, MTD, App sandboxing

8. IoT Security

- Protects smart and connected devices.
- Examples: Device authentication, Network segmentation

9. Critical Infrastructure Security

- Secures essential services and national systems.
- Examples: SCADA & ICS protection, Intrusion detection

10. Operational Technology (OT) Security

- Protects industrial systems and physical processes.
- Examples: PLC protection, OT traffic monitoring

11. Security Awareness Training

- Educates users to prevent cyber incidents.
- Examples: Phishing simulations, Policy training

12. Incident Response

- Manages cyberattacks and system recovery.
- Examples: Response plans, Forensic analysis

Comprehensive National Cybersecurity Initiative John Rollins,2009-12 Contents Introduction Background on Cyber Threats and Calls for Executive Action Comprehensive National Cybersecurity Initiative and Concerns Regarding Transparency and Effectiveness Legal Authorities for Executive Branch Responses to Cyber Threats Separation of Powers in National Security Matters Congressional Constraints on Executive Action Policy Considerations and Congressional Options Conclusion *Cybersecurity* United States. Congress. Senate. Committee on Commerce, Science, and Transportation,2010 *Cybersecurity and Homeland Security* Lin V. Choi,2005 Cybersecurity refers to three things measures to protect information technology the information it contains processes and transmits and associated physical and virtual elements which together comprise cyberspace the degree of protection resulting from application of those measures and the associated field of professional endeavor Virtually any element of cyberspace can be at risk and the degree of interconnection of those elements can make it difficult to determine the extent of the cybersecurity framework that is needed Identifying the major weaknesses in U S cybersecurity is an area of some controversy the defense against attacks on computer systems and associated infrastructure has appeared to be generally fragmented and varying widely in effectiveness

Fixing American Cybersecurity Larry Clinton,2023-02-01 Advocates a cybersecurity social contract between government and business in seven key economic sectors Cybersecurity vulnerabilities in the United States are extensive affecting everything from national security and democratic elections to critical infrastructure and economy In the past decade the number of cyberattacks against American targets has increased exponentially and their impact has been more costly than ever before A successful cyber defense can only be mounted with the cooperation of both the government and the private sector and only when individual corporate leaders integrate cybersecurity strategy throughout their organizations A collaborative effort of the Board of Directors of the Internet Security Alliance Fixing American Cybersecurity is divided into two parts Part One analyzes why the US approach to cybersecurity has been inadequate and ineffective for decades and shows how it must be transformed to counter the heightened systemic risks that the nation faces today Part Two explains in

detail the cybersecurity strategies that should be pursued by each major sector of the American economy health defense financial services utilities and energy retail telecommunications and information technology Fixing American Cybersecurity will benefit industry leaders policymakers and business students This book is essential reading to prepare for the future of American cybersecurity

U.S. National Cybersecurity Grace Powers,2014

Emerging Cyber Threats to the United States Cybersecurity, Infrastructure Protection, and Security Technologies of the Committee on Homeland Security House of Representatives Subcommittee,2017-05-05 The United States faces evolving cybersecurity threats from nation states such as China Russia North Korea and Iran as well as cyber threats from criminal organizations and terrorist groups such as ISIS These actors continue to develop and build more sophisticated cyber capabilities These hackers now pose an even greater threat to the U S homeland and critical infrastructure Cybersecurity more than ever is National security In 2015 the U S was the victim of one of the most significant cyber attacks in its history The breach at the Office of Personnel Management exposed the personal and security clearance information of 21 5 million current and former Government employees In 2014 North Korea conducted a cyber attack on Sony Pictures that not only destroyed computers but also was intended to stifle free speech and threaten American ideals The Obama administration s lack of proportional responses to these cyber attacks has signaled to the world that there are no real consequences for such actions Without a comprehensive National cybersecurity strategy that establishes deterrence the future could bring an increasing number of adversaries that are willing to conduct cyber attacks against the United States

Federal Cybersecurity Ryan I. Brooks,Dorothy E. Kelly,2012 The federal government s role in protecting U S citizens and critical infrastructure from cyber attacks has been the subject of recent congressional interest This book discusses selected legal issues that frequently arise in the context of recent legislation to address vulnerabilities of critical infrastructure to cyber threats efforts to protect government networks from cyber threats and proposals to facilitate and encourage sharing of cyber threat information amongst private sector and government entities

Cybersecurity, Actions Needed to Strengthen U.S. Capabilities United States. Government Accountability Office,2017-07-11 Cyber based intrusions and attacks on federal systems and systems supporting our nation s critical infrastructure such as communications and financial services are evolving and becoming more sophisticated GAO first designated information security as a government wide high risk area in 1997 This was expanded to include the protection of cyber critical infrastructure in 2003 and protecting the privacy of personally identifiable information in 2015 This statement 1 provides an overview of GAO s work related to cybersecurity of the federal government and the nation s critical infrastructure and 2 identifies areas of consistency between GAO recommendations and those recently made by the Cybersecurity Commission and CSIS In preparing this statement GAO relied on previously published work and its review of the two recent reports issued by the Commission and CSIS

Cybersecurity, Cyberanalysis and Warning United States. Government Accountability Office,2009 Cyber analysis and warning capabilities are critical to thwarting computer based

cyber threats and attacks The Department of Homeland Security DHS established the United States Computer Emergency Readiness Team US CERT to among other things co ordinate the nation s efforts to prepare for prevent and respond to cyber threats to systems and communications networks The authors objectives were to 1 identify key attributes of cyber analysis and warning capabilities 2 compare these attributes with US CERT s current capabilities to identify whether there are gaps and 3 identify US CERT s challenges to developing and implementing key attributes and a successful national cyber analysis and warning capability To address these objectives the authors identified and analysed related documents observed operations at numerous entities and interviewed responsible officials and experts

Cybersecurity Edward C. Liu, Gina Stevens, Kathleen Ann Ruane, Alissa M. Dolan, Richard M. Thompson, II, 2012-07-09 The federal government s role in protecting U S citizens and critical infrastructure from cyberattacks has been the subject of recent congressional interest Critical infrastructure commonly refers to those entities that are so vital that their incapacitation or destruction would have a debilitating impact on national security economic security or the public health and safety This report discusses selected legal issues that frequently arise in the context of recent legislation to address vulnerabilities of critical infrastructure to cyber threats efforts to protect government networks from cyber threats and proposals to facilitate and encourage sharing of cyber threat information among private sector and government entities This report also discusses the degree to which federal law may preempt state law It has been argued that in order to ensure the continuity of critical infrastructure and the larger economy a regulatory framework for selected critical infrastructure should be created to require a minimum level of security from cyber threats On the other hand others have argued that such regulatory schemes would not improve cybersecurity while increasing the costs to businesses expose businesses to additional liability if they fail to meet the imposed cybersecurity standards and increase the risk that proprietary or confidential business information may be inappropriately disclosed In order to protect federal information networks the Department of Homeland Security DHS in conjunction with the National Security Agency NSA uses a network intrusion system that monitors all federal agency networks for potential attacks Known as EINSTEIN this system raises significant privacy implications a concern acknowledged by DHS interest groups academia and the general public DHS has developed a set of procedures to address these concerns such as minimization of information collection training and accountability requirements and retention rules Notwithstanding these steps there are concerns that the program may implicate privacy interests protected under the Fourth Amendment Although many have argued that there is a need for federal and state governments and owners and operators of the nation s critical infrastructures to share information on cyber vulnerabilities and threats obstacles to information sharing may exist in current laws protecting electronic communications or in antitrust law Private entities that share information may also be concerned that sharing or receiving such information may lead to increased civil liability or that shared information may contain proprietary or confidential business information that may be used by competitors or government regulators for unauthorized

purposes Several bills in the 112th Congress would seek to improve the nation s cybersecurity and may raise some or all of the legal issues mentioned above For example H R 3523 Rogers Mich Ruppertsberger addresses information sharing between the intelligence community and the private sector H R 3674 Lungren includes provisions regarding the protection of critical infrastructure as well as information sharing H R 4257 Issa Cummings would require all federal agencies to continuously monitor their computer networks for malicious activity and would impose additional cybersecurity requirements on all federal agencies S 2102 Feinstein seeks to facilitate information sharing S 2105 Lieberman includes the information sharing provisions of S 2102 as well as provisions relating to the protection of critical infrastructure and federal government networks S 2151 McCain and H R 4263 Bono Mack also addresses information sharing among the private sector and between the private sector and the government Many of these bills also include provisions specifically addressing the preemption of state laws Cyber Security United States.
