Traveling Salesman Problem Using Genetic Algorithm A Survey:

Traveling Salesman Problem Federico Greco,2008-09-01 The idea behind TSP was conceived by Austrian mathematician Karl Menger in mid 1930s who invited the research community to consider a problem from the everyday life from a mathematical point of view A traveling salesman has to visit exactly once each one of a list of m cities and then return to the home city He knows the cost of traveling from any city i to any other city j Thus which is the tour of least possible cost the salesman can take In this book the problem of finding algorithmic technique leading to good optimal solutions for TSP or for some other strictly related problems is considered TSP is a very attractive problem for the research community because it arises as a natural subproblem in many applications concerning the every day life Indeed each application in which an optimal ordering of a number of items has to be chosen in a way that the total cost of a solution is determined by adding up the costs arising from two successively items can be modelled as a TSP instance Thus studying TSP can never be considered as an abstract research with no real importance

Introduction to Evolutionary Algorithms Xinjie Yu,Mitsuo Gen,2010-06-10 Evolutionary algorithms are becoming increasingly attractive across various disciplines such as operations research computer science industrial engineering electrical engineering social science and economics Introduction to Evolutionary Algorithms presents an insightful comprehensive and up to date treatment of evolutionary algorithms It covers such hot topics as genetic algorithms differential evolution swarm intelligence and artificial immune systems The reader is introduced to a range of applications as Introduction to Evolutionary Algorithms demonstrates how to model real world problems how to encode and decode individuals and how to design effective search operators according to the chromosome structures with examples of constraint optimization multiobjective optimization combinatorial optimization and supervised unsupervised learning This emphasis on practical applications will benefit all students whether they choose to continue their academic career or to enter a particular industry Introduction to Evolutionary Algorithms is intended as a textbook or self study material for both advanced undergraduates and graduate students Additional features such as recommended further reading and ideas for research projects combine to form an accessible and interesting pedagogical approach to this widely used discipline
