Rural Development in the Digital Age Martin Pěluha, Edward Kasabov, 2019-10-24 Rural Development in the Digital Age explores current theoretical and policy developments in EU rural policy during the 4 0 period The book offers an analysis of the contradictory and complex drivers and multiple impacts of Period 4 0 policy within the specific territorial context of its implementation It is commonly agreed within academic and policy circles that the contexts trends drivers and impacts which are currently morphing have the potential to determine the nature and boundaries of rural areas in the longer term The authors examine inconsistencies in the design and implementation of EU rural development policy driven largely by intensifying neo productivist pressures The importance and novelty of the book lie in defining and critically examining the territorial impacts of neo productivism as an ideology a practice and a set of policy imperatives during the EU s 2014 2020 programming period The authors argue that such a paradigm shift in EU rural policy may reduce its effectiveness and ability to meet its goals of balanced territorial development and cohesion This book will be of interest to advanced students researchers and policymakers in rural policy regional studies economic geography and EU policy
