Fourth Conference on Engineering Design: Engineering Design and Design Education; Proceedings. Toward a Science of Design , 1968 Writing Assignments Across University Disciplines Roger Graves, 2017-12-07 Writing Assignments Across the University Curriculum as a whole asks and answers these questions What kinds of documents do students write in a wide range of university degree programs in Canada How do instructors structure those writing assignments That is who is the audience for the assignments Do students get formative feedback as they develop their documents Do the patterns we found in a small liberal arts college Graves Hyland and Samuels 2010 occur in other kinds of universities We took our cue from an article by Anson and Dannels 2009 who pointed us toward the idea that students experience a curriculum through their degree progress in an academic program Consequently we needed to map the writing assignments according to how different departments organized these degree programs Results that were organized by curricular unit departments faculties or colleges or programs units were more significant than general statistics because students would progress through these courses to a degree Several chapters in the book describe how this kind of curricular mapping provided a spark for curricular reform in Engineering Education and an entire small university The last two chapters report on the instructors perspective on their assignments what they were intending to do and why they both resisted and engaged in curricular discussions
