

ENGINEERING DRAWING

16. What is an isometric drawing?

A 3D representation where axes are spaced at 120 degrees, showing depth without perspective distortion.

17. Why are isometric drawings used?

To provide a clear, visual representation of an object's 3D shape for non-technical audiences.

18. Where are isometric drawings commonly found?

In technical manuals, presentations, and instructional diagrams.

19. How does an isometric drawing differ from a perspective drawing?

Isometric drawings use parallel lines and equal scaling, while perspective drawings mimic realistic depth with converging lines.

20. When is a perspective drawing preferred?

For presentations or marketing to show a realistic, artistic view of a product.

21. What is a sectional view in engineering drawing?

A view showing internal features by cutting away part of the object along a plane.

22. Why are sectional views important?

They reveal hidden internal structures, like holes or cavities, not visible in external views.

23. Where are sectional views typically used?

In drawings of complex parts, such as engine components or assemblies with internal features.

24. How is a sectional view indicated?

With a cutting plane line, arrows showing the view direction, and a labeled section view.

25. When is a full section view used?

When the entire internal structure along a cutting plane needs to be shown.

26. What is a half-section view?

A view combining a sectional view of one half with an external view of the other half.

27. Why is a half-section view useful?

It shows both internal and external features in one view, saving space and improving clarity.

28. Where is a revolved section view applied?

In drawings of cylindrical parts to show cross-sectional shapes rotated into the view plane.

29. How does a broken-out section differ from a full section?

A broken-out section shows only a portion of the interior, while a full section cuts through the entire object.

30. When is an offset section view necessary?

When a cutting plane must change direction to reveal multiple internal features.
