For every problem he addresses, Goodman not only offers code but a discussion of how and why the solution works. Recipes range from simple tasks such as manipulating strings and validating dates in JavaScript to entire libraries that demonstrate complex tasks such as cross-browser positioning of HTML elements, sorting tables, and implementing Ajax features on the client. Ideal for novices as well as experienced scripters, this book contains more than 150 recipes for Working with interactive forms and style sheets, Presenting user-friendly page navigation, Creating dynamic content via Document Object Model scripting, Producing visual effects for stationary content, Positioning HTML elements, Working with XML data in the browser. Recipes in this Cookbook are compatible with the latest W3C standards and browsers including Internet Explorer 7, Firefox 2, Safari, and Opera 9. Several new recipes provide client-side Ajax solutions, and many recipes from the previous edition have been revised to help you build extensible user interfaces for Web 2.0 applications.
