Contemporary Communication Systems Using MATLAB John G. Proakis, Masoud Salehi, 1998 This text contains a large number of MATLAB based problems dealing with topics covered in a first course in communication systems Each chapter contains fundamental concepts briefly reviewed and presents illustration problems using MATLAB Each chapter contains a list of MATLAB files used

Essentials of Communication Systems Engineering John G. Proakis, Masoud Salehi, 2005

Digital Transmission Dayan Adionel Guimaraes, 2010-01-18 Digital Transmission A Simulation Aided Introduction with VisSim Comm is a book in which basic principles of digital communication mainly pertaining to the physical layer are emphasized Nevertheless these principles can serve as the fundamentals that will help the reader to understand more advanced topics and the associated technology In this book each topic is addressed in two different and complementary ways theoretically and by simulation The theoretical approach encompasses common subjects covering principles of digital transmission like notions of probability and stochastic processes signals and systems baseband and passband signaling signal space representation spread spectrum multi carrier and ultra wideband transmission carrier and symbol timing recovery information theory and error correcting codes The simulation approach revisits the same subjects focusing on the capabilities of the communication system simulation software VisSim Comm on helping the reader to fulfill the gap between the theory and its practical meaning The presentation of the theory is made easier with the help of 357 illustrations A total of 101 simulation files supplied in the accompanying CD support the simulation oriented approach A full evaluation version and a viewer only version of VisSim Comm are also supplied in the CD

Contemporary Communication Systems Using MATLAB John G. Proakis, Masoud Salehi, Gerhard Bauch, 2012-07-19 Featuring a variety of applications that motivate students this book serves as a companion or supplement to any of the comprehensive textbooks in communication systems The book provides a variety of exercises that may be solved on the computer using MATLAB By design the treatment of the various topics is brief The authors provide the motivation and a short introduction to each topic establish the necessary notation and then illustrate the basic concepts by means of an example Important Notice Media content referenced within the product description or the product text may not be available in the ebook version
