Treatment and Rehabilitation of the Chronic Alcoholic Benjamin Kissin,2012-12-06 The present volume contains a large variety of treatment approaches to the long term rehabilitation of the alcoholic ranging from the biological to the physiological to the psychological to the social The multiplicity of proposed therapies each of which has its strong proponents suggests that alcoholism is either a complex medical social disease syndrome requiring a multipronged treatment approach or a very simple illness for which we have not yet discovered the remedy The latter may indeed be true but we cannot use what we do not know and must use what we do know We do however have the obligation to be responsible in our treatment to provide the best that is known at this time and to be discriminating in our prescription of appropriate treatment for individual patients If there is one conclusion we would like to offer in our preface it is that alcoholics constitute a markedly heterogeneous population with widely disparate needs for whom at least at our present level of knowledge a broad spectrum of treatment modalities is necessary If this is true then probably most of this book has validity With this volume on the treatment and rehabilitation of the chronic alcoholic we bring to completion our five volume series The Biology of Alcoholism As the title of the present volume indicates we have departed from our original intention to deal solely with biological aspects of the syndrome and have attempted rather to produce a more comprehensive work
