Hoogeboom,2005-02-25 Ultimate Math Contest Preparation, Problem Solving Strategies, and Math IQ Puzzles Grade 6
and 7 Amanda Ho, Frank Ho,2019-04-28 I wrote this workbook with a vision that is I wanted to create a workbook which I
think will be good and useful for children This workbook was created based on my personal educational background and
teaching experience and my own chess coaching experience with my own son All these experiences and observations tell me
that a student has a higher IQ and has higher than average math score does not mean necessarily that this student will do
well in math contests Everybody can learn math but the results could be very different Other than to have a smart brain and
the ability to learn math faster than the other children a child needs other qualities to do well consistently in math contests
These special qualities include perseverance patience and willingness to take the time to think The ability to be able to draw
a conclusion do comparisons expand and instil learned knowledge onto other problems can follow and write procedures or

steps neatly and logically organize and list data visualize spatial relations The student could be trained vigorously but without real interest and willingness to work on problems then the enthusiasm of training on math contests will last long so we know to use one pure math contest workbook alone is difficult to achieve the effect of all around training The is my vision of creating this integrated 3 in 1 unique workbook Why is this workbook so huge What unique is about this workbook How to train a child to be more patient How to train a student to observe and compare One way of achieving these is to use puzzles this is the main reason that puzzles are included in this book Further puzzles can increase a child s IQ How to train a child to think out of the box and be creative The integrated chess Sudoku and math computational puzzles can help When considering all the above purposes the result is that this workbook has become a huge workbook How did I get started to create this workbook I received my university education in Taiwan and later received my Science of Statistics master s degree in the US My working of teaching and research of math at my own learning Centre Ho Math Chess based in Canada has offered me insights on how math is taught differently in different countries The integrated game is a good way of learning math in our case chess is integrated into our worksheets not a totally separate subject This is one uniqueness of our series of Ultimate Math Contest Preparation Problem Solving Strategies and Math IQ Puzzles workbook Since each of our workbooks has many different parts so students could pick other materials other than math contest Why teachers coaches parents or students should buy this workbook We need a workbook which not only just teaches math contest it should also be fun for children to work on and at the same time to enhance their brain power This is the vision which leads me to create this workbook and if you agree with my idea and view then this world s first 3 in 1 integrated math contest problem solving strategies and fun math IQ workbook is for you and your student or child *Problem Solver 2/Gr 6/Wkbk* Judy Goodnow, McGraw-Hill Education, Shirley Hoogeboom, 2005
