CHAPTER-7: CHARTS IN EXCEL

EXERCISE D: Short answer type questions.

1. What is chart?

Ans:

1. A chart is an effective way to display data in a pictorial form. It makes it easier to draw comparison and analyse the growth, relationship and trends among the values in a table.

2. Define data series.

Ans:

2. Data series is related to the set of values. It is represented by the bars or slices that represent the data values.

3. What is area chart?

Ans:

3. Area chart displays the quantitative magnitude of the data graphically.

EXERCISE E: Long answer type questions.

1. Define any three components of a chart.

Ans:

1. (i) **Data Labels:** Data labels includes data values, category name, series name, legend keys and values from cells.

(ii) **X-axis:** X-axis is the horizontal axis of the chart. It is also called the category axis.

(iii) **Legend:** Legend is a key which shows the meanings of symbols and colours used in the chart.

2. What is the difference between column chart bar chart?

Ans:

2. (i) Column Chart displays the data in the form of vertical bars. Whereas bar chart displays the data in the form of horizontal bars.

(ii) In this chart, categories are on the horizontal axis and the values are represented on the vertical axis. Whereas, in this chart, categories are represented on the vertical axis and values are represented on the horizontal axis.

IGNOU BCA Operating System Concepts and Networking Management Previous Year Solved Papers MCS 022

Manish Soni, 2024-11-13 Understanding Operating Systems and Networking Management is essential for every computer science student especially those pursuing a Bachelor of Computer Applications BCA. These domains form the backbone of computer system operations influencing everything from process execution and memory allocation to file management and system security. With the increasing complexity of computing environments having a solid grasp of these concepts is more important than ever. In this context IGNOU BCA Operating System Concepts and Networking Management Previous Year Solved Papers MCS 022 has been carefully compiled to support students in their exam preparation journey. This book brings together a series of previous years examination papers from the Indira Gandhi National Open University IGNOU accompanied by detailed step by step solutions and thorough explanations tailored to meet the academic standards of the BCA program. The primary aim of this book is to help students become familiar with the exam format comprehend the style and depth of questions and strengthen their conceptual foundation. Covering core topics such as process management memory management file systems input output systems and network management principles each solution is designed not only to answer the question but also to provide insight into the reasoning behind it. This resource serves as both a revision tool and a means of self assessment. By engaging with these solved papers students can evaluate their readiness identify gaps in their understanding and improve their problem solving and analytical thinking skills. The inclusion of papers from multiple examination cycles ensures a broad and in depth understanding of the subject matter and reflects the changing trends in exam patterns. Prepared by experienced educators and industry professionals the solutions presented in this book are accurate relevant and aligned with current academic and practical requirements. We hope this compilation becomes a reliable guide for students empowering them to approach their examinations with confidence and clarity.

Applied Physics, System Science and Computers Klimis Ntalianis, Anca Croitoru, 2017-07-20 This book reports on advanced theories and methods in three related fields of research applied physics system science and computers. It is organized in two main parts the first of which covers applied physics topics including lasers and accelerators condensed matter soft matter and materials science nanoscience and quantum engineering atomic molecular optical and plasma physics as well as nuclear and high energy particle physics. It also addresses astrophysics gravitation earth and environmental science as well as medical and biological physics. The second part focuses on advances in system science and computers exploring automatic circuit control power systems computer communication fluid mechanics simulation and modeling software engineering data structures and applications of artificial intelligence among other areas. Offering a collection of contributions presented at the 1st International Conference on Applied Physics System Science and Computers APSAC 2016 the book bridges the gap between applied physics and electrical engineering. It not only presents new methods but also promotes collaborations.

between different communities working on related topics at the interface between physics and engineering with a special focus on communication data modeling and visualization quantum information applied mechanics as well as bio and geophysics
