Can We Survive Our Origins? Pierpaolo Antonello, Paul Gifford, 2015-01-01 Are religions intrinsically violent as is strenuously argued by the new atheists Or as Girard argues have they been functionally rational instruments developed to manage and cope with the intrinsically violent runaway dynamic that characterizes human social organization in all periods of human history Is violence decreasing in this time of secular modernity post Christendom as argued by Steven Pinker and others Or are we rather at increased and even apocalyptic risk from our enhanced powers of action and our decreased socio symbolic protections Rene Girard s mimetic theory has been slowly but progressively recognized as one of the most striking breakthrough contributions to twentieth century critical thinking in fundamental anthropology in particular for its power to model and explain violent sacralities ancient and modern The present volume sets this power of explanation in an evolutionary and Darwinian frame It asks How far do cultural mechanisms of controlling violence which allowed humankind to cross the threshold of hominization i e to survive and develop in its evolutionary emergence still represent today a default setting that threatens to destroy us Can we transcend them and escape their field of gravity Should we look to or should we look beyond Darwinian survival What and where if anywhere is salvation [Decriminalizing Abortion in Northern Ireland](#)

Fiona Bloomer, Emma Campbell, 2022-10-06 Abortion remains one of the most politicized issues globally and whilst some countries such as the USA continue to experience restrictions to access to abortion Northern Ireland stands out as having enacted historical positive change in abortion law from an almost complete ban throughout the Twentieth Century to decriminalization achieved in 2019 This book documents and analyzes how this historical change was achieved This the second of two volumes places emphasis on allies and support for abortion provision illustrating how the movement has relied upon an intersectional network of social movement actors NGOs and fundraisers to maintain momentum and inclusivity It also focuses on the reality of abortion provision Each chapter is written by those directly involved in the long fought battle to change abortion law including those with personal experience of seeking abortions activists academics legal experts political actors NGOs and volunteers This interdisciplinary text will be of relevance to academics and students in the disciplines of law policy political science and sociology but also to organizers and policy makers in other global contexts and across other social justice campaigns *Performing Technology* Franziska Schroder, 2009-10-02 This volume emerged out of the discussions during the 2009 edition of the Two Thousand symposia series at the Sonic Arts Research Centre Belfast In 2009 the symposium focused on user generated content and it is the refined and reworked writings that have been included in this volume The texts in this book cover the development of design strategies for addressing rich media environments that incorporate user generated locative content Chapters cover areas such as choreography dance virtual worlds music performance network music and computer games [Public Value](#) Adam Lindgreen, Nicole Koenig-Lewis, Martin Kitchener, John Brewer, Mark Moore, Timo Meynhardt, 2019-05-08 Over the last 10 years the concept of value has emerged in

both business and public life as part of an important process of measuring benchmarking and assuring the resources we invest and the outcomes we generate from our activities In the context of public life value is an important measure on the contribution to business and social good of activities for which strict financial measures are either inappropriate or fundamentally unsound A systematic interdisciplinary examination of public value is necessary to establish an essential definition and up to date picture of the field In reflecting on the public value project this book points to how the field has broadened well beyond its original focus on public sector management has deepened in terms of the development of the analytical concepts and frameworks that linked the concepts together and has been applied increasingly in concrete circumstances by academics consultants and practitioners This book covers three main topics deepening and enriching the theory of creating public value broadening the theory and practice of creating public value to voluntary and commercial organisations and collaborative networks and the challenge and opportunity that the concept of public value poses to social science and universities Collectively it offers new ways of looking at public and social assets against a backdrop of increasing financial pressure new insights into changing social attitudes and perceptions of value and new models for increasingly complicated collaborative forms of service delivery involving public private and not for profit players

Research Methods for International Human Rights Law Damian Gonzalez-Salzburg, Loveday Hodson, 2019-06-13 The study and teaching of international human rights law is dominated by the doctrinal method A wealth of alternative approaches exists but they tend to be discussed in isolation from one another This collection focuses on cross theoretical discussion that brings together an array of different analytical methods and theoretical lenses that can be used for conducting research within the field As such it provides a coherent accessible and diverse account of key theories and methods A distinctive feature of this collection is that it adopts a grounded approach to international human rights law through demonstrating the application of specific

research methods to individual case studies By applying the approach under discussion to a concrete case it is possible to better appreciate the multiple understandings of international human rights law that are missed when the field is only comprehended through the doctrinal method Furthermore since every contribution follows the same uniform structure this allows for fruitful comparison between different approaches to the study of our discipline
