Proceedings of the 2015 Federated Conference on Software Development and Object Technologies Jan

Janech, Jozef Kostolny, Tomasz Gratkowski, 2016-12-14 This book presents the proceedings of the International Conference SDOT which was organized at the University of Ilia Faculty of Management Sciences and Informatics Slovak Republic in November 19 2015 The conference was truly international both in terms of the amount of foreign contributions and in terms of composition of steering and scientific committees The book and the conference serves as a platform of professional exchange of knowledge and experience for the latest trends in software development and object oriented technologies theory and practice This proceedings present information on the latest developments and mediate the exchange of experience between practitioners and academia

Smart Modelling for Engineering Systems Margarita N. Favorskaya, Alena V.

Favorskaya, Igor B. Petrov, Lakhmi C. Jain, 2021-01-30 This book is a collection of research papers selected for presentation at the International Conference on Smart Computational Methods in Continuum Mechanics 2021 organized by Moscow Institute of Physics and Technology and the Institute for Computer Aided Design of Russian Academy of Sciences The work is presented in two volumes The primary objective of the book is to report the state of the art on smart computational paradigms in continuum mechanics and explore the use of artificial intelligence paradigms such as neural nets and machine learning for improving the performance of the designed engineering systems The book includes up to date smart computational methods which are used to solve problems in continuum mechanics engineering seismic prospecting non destructive testing and so on The main features of the book are the research papers on the application of novel smart methods including neural nets and machine learning computational algorithms smart software systems and high performance computer systems for solving complex engineering problems The case studies pertaining to the real world applications in the above fields are included The book presents a collection of best research papers in English language from some of the world leaders in the field of smart system modelling and design of engineering systems

Web Services Gustavo Alonso, Fabio

Casati, Harumi Kuno, Vijay Machiraju, 2013-03-14 Like many other incipient technologies Web services are still surrounded by a tremendous level of noise This noise results from the always dangerous combination of wishful thinking on the part of research and industry and of a lack of clear understanding of how Web services came to be On the one hand multiple contradictory interpretations are created by the many attempts to realign existing technology and strategies with Web services On the other hand the emphasis on what could be done with Web services in the future often makes us lose track of what can be really done with Web services today and in the short term These factors make it extremely difficult to get a coherent picture of what Web services are what they contribute and where they will be applied Alonso and his co authors deliberately take a step back Based on their academic and industrial experience with middleware and enterprise application integration systems they describe the fundamental concepts behind the notion of Web services and present them as the

natural evolution of conventional middleware necessary to meet the challenges of the Web and of B2B application integration. Rather than providing a reference guide or a how to write your first Web service kind of book they discuss the main objectives of Web services, the challenges that must be faced to achieve them and the opportunities that this novel technology provides. Established as well as recently proposed standards and techniques e.g. WSDL, UDDI, SOAP, WS-Coordination, WS-Transactions and BPEL are then examined in the context of this discussion in order to emphasize their scope, benefits and shortcomings. Thus the book is ideally suited both for professionals considering the development of application integration solutions and for research and students interesting in understanding and contributing to the evolution of enterprise application technologies.

Information Systems Architecture and Technology: Proceedings of 37th International Conference on Information Systems Architecture and Technology - ISAT 2016 - Part III Jerzy Świątek, Zofia

Wilimowska, Leszek Borzemski, Adam Grzech, 2016-09-23. This four volume set of books constitutes the proceedings of the 2016 37th International Conference Information Systems Architecture and Technology ISAT or ISAT 2016 for short held on September 18-20, 2016 in Karpacz, Poland. The conference was organized by the Department of Management Systems and the Department of Computer Science, Wrocław University of Science and Technology, Poland. The papers included in the proceedings have been subject to a thorough review process by highly qualified peer reviewers. The accepted papers have been grouped into four parts: Part I addressing topics including but not limited to systems analysis and modeling methods for managing complex planning environment and insights from Big Data research projects; Part II discoursing about topics including but not limited to Web systems, computer networks, distributed computing and multi-agent systems and Internet of Things; Part III discussing topics including but not limited to mobile and Service Oriented Architecture systems, high performance computing, cloud computing, knowledge discovery, data mining and knowledge based management; Part IV dealing with topics including but not limited to finance, logistics and market problems and artificial intelligence methods.

Fundamentals Of Robotics: Linking Perception To Action Ming Xie, 2003-04-11. Tomorrow's robots which includes the humanoid robot can perform tasks like tutoring children, working as tour guides, driving humans to and from work, doing the family shopping, etc. Tomorrow's robots will enhance lives in ways we never dreamed possible. No time to attend the decisive meeting on Asian strategy? Let your robot go for you and make the decisions. Not feeling well enough to go to the clinic? Let Dr. Robot come to you, make a diagnosis and get you the necessary medicine for treatment. No time to coach the soccer team this week? Let the robot do it for you. Tomorrow's robots will be the most exciting and revolutionary things to happen to the world since the invention of the automobile. It will change the way we work, play, think and live. Because of this, nowadays robotics is one of the most dynamic fields of scientific research. These days, robotics is offered in almost every university in the world. Most mechanical engineering departments offer a similar course at both the undergraduate and graduate levels. And increasingly many computer and electrical engineering departments are also offering it. This book will guide you, the curious

beginner from yesterday to tomorrow The book will cover practical knowledge in understanding developing and using robots as versatile equipment to automate a variety of industrial processes or tasks But the book will also discuss the possibilities we can look forward to when we are capable of creating a vision guided learning machine
