A nurse is teaching a patient about medications. Which statement from the patient indicates teaching is effective?

- a. "My parenteral medication must be taken with food."
- b. "I will rotate the sites in my left leg when I give my insulin."
- c. "Once I start feeling better, I will stop taking my antibiotic."
- d. "If I am 30 minutes late taking my medication, I should skip that dose." **CORRECT ANSWERS "I will rotate the sites in my left leg when I give my insulin."**

For daily insulin, rotate site within anatomical area. Rotating injections within the same body part (intrasite rotation) provides greater consistency in absorption of medication. Parenteral medication absorption is not affected by the timing of meals. Taking a medication 30 minutes late is within the 60-minute window of the time medications should be taken.

A nurse is preparing to administer an injection to a patient. Which statement made by the patient is an indication for the nurse to use the Z-track method?

- a. "I am allergic to many medications."

- c. "The last shot like that turned my skin colors."
- d. "My legs are too obese for the needle to go through." **CORRECT ANSWERS "The last shot like that turned my skin colors."**

The Z-track is indicated when the medication being administered has the potential to irritate sensitive tissues. It is recommended that, when administering IM injections, the Z-track method be used to minimize local skin irritation by sealing the medication in muscle tissue. The Z-track method is not meant to reduce discomfort from the procedure.
