Building an Enterprise Chatbot

Abhishek Singh, Karthik Ramasubramanian, Shrey Shivam, 2019-09-13

Explore the adoption of chatbots in business by focusing on the design deployment and continuous improvement of chatbots in a business with a single use case from the banking and insurance sector

This book starts by identifying the business processes in the banking and insurance industry

This involves data collection from sources such as conversations from customer service centers online chats emails and other NLP sources

You ll then design the solution architecture of the chatbot

Once the architecture is framed the author goes on to explain natural language understanding NLU natural language processing NLP and natural language generation NLG with examples

In the next sections you ll design and implement the backend framework of a typical chatbot from scratch

You will also explore some popular open source chatbot frameworks such as Dialogflow and LUIS

The authors then explain how you can integrate various third party services and enterprise databases with the custom chatbot framework

In the final section you ll discuss how to deploy the custom chatbot framework on the AWS cloud

By the end of Building an Enterprise Chatbot you will be able to design and develop an enterprise ready conversational chatbot using an open source development platform to serve the end user

What You Will Learn

Identify business processes where chatbots could be used

Focus on building a chatbot for one industry and one use case rather than building a ubiquitous and generic chatbot

Design the solution architecture for a chatbot

Integrate chatbots with internal data sources using APIs

Discover the differences between natural language understanding NLU natural language processing NLP and natural language generation NLG

Work with deployment and continuous improvement through representational learning
