Michael McCarthy Discourse Analysis:

Discourse Analysis for Language Teachers Michael McCarthy, 1991-05-02 A practical introduction to the field of discourse analysis and its relevance for language teaching **Language as Discourse** Michael McCarthy, Ronald Carter, 2014-07-22

In this book Michael McCarthy and Ronald Carter describe the discursive properties of language and demonstrate what insights this approach can offer to the student and teacher of language The authors examine the relationship between complete texts both spoken and written and the social and cultural contexts in which they function They argue that the functions of language are often best understood in a discursive environment and that exploring language in context compels us to revise commonly held understandings about the forms and meanings of language In so doing the authors argue the need for language teachers syllabus planners and curriculum organisers to give greater attention to language as discourse

Issues in Applied Linguistics Michael McCarthy, 2001-02 This book provides a wide ranging treatment of the major issues in applied linguistics *Spoken Language and Applied Linguistics* Michael McCarthy, 1998-12-03 This book argues for putting spoken language at the centre of the syllabus

Materials Development in Language Teaching Brian Tomlinson, 1998-03-05 This book engages with current issues in developing materials for language teaching

Crossing Boundaries Richard Nordquist, 2010 The articles in this volume were originally presented in spring 2009 at an international conference hosted by the Institute of Germanic and Romance Languages and Cultures at Tallinn University in Estonia The theme of crossing boundaries is reflected in the rich mix of genres cultures applications and critical theories considered here Indeed these articles demonstrate that crossing boundaries can be a companionable journey as well an intellectually enriching experience **Beyond Training** Jack C. Richards, 1998-02-13 Beyond Training examines the nature of second language teacher development and how teachers practices are influenced by their beliefs and principles It seeks to move discussion of language teacher development beyond the level of training which reflects a technical view of specific teaching practices

Instead it takes a more holistic approach to teacher development built on the notion of the teacher as critical and reflective thinker The argument pursued throughout is that teacher education needs to engage teachers not merely in the mastery of techniques but in an exploration of the knowledge beliefs and attitudes that underly their teaching practices *Teaching*

the Spoken Language Gillian Brown, George Yule, 1983-11-24 In this book the authors examine the nature of spoken language

and how it differs from written language both in form and purpose A large part of it is concerned with principles and techniques for teaching spoken production and listening comprehension An important chapter deals with how to assess spoken language The principles and techniques described apply to the teaching of English as a foreign and second language and are also highly relevant to the teaching of the mother tongue *Teaching Languages to Young Learners* Lynne Cameron,2001-03-15 This book will develop readers understanding of children are being taught a foreign language

Exploring Spoken English Ronald Carter,Michael McCarthy,1997-03-13 A practical insightful exploration of natural spoken English based on 20 varied authentic extracts Exploring Spoken English is a practical guide to the features of natural spoken English designed for teachers and advanced learners of English for use in groups and for self study The material consists of 20 varied extracts of authentic spoken English drawn from the Cambridge University Press and University of Nottingham corpus of spoken English Each unit contains an activity for the reader and a line by line commentary offering new insights into grammar vocabulary and discourse patterns in the text Audio CDs to accompany this book available to purchase separately contain all the extracts some re recorded for the purposes of clarity **Cross-cultural Discourse**

Long,1991 Understanding how people learn and fail to learn second and foreign languages is increasingly recognised as a critical social and psycholinguistic issue This book provides a synthesis of empirical findings on second and foreign language learning by children and adults emphasising the design and execution of appropriate research **RELC Journal** Regional English Language Centre,1992
