Keeping Up with Emerging Technologies

Nicole Hennig,2017-06-21 The acceleration of technological change demands that today s information professionals and educators not only be constantly acquiring new knowledge and skills but also that they cultivate the ability to make sound judgments on which technologies to embrace Today s librarians and information specialists know it s imperative that they keep up with new technologies But not all technologies are equally important either within the library setting or to library patrons So how does one decide which ones to pursue and integrate into services In the uphill battle to stay current with new and emerging technologies deciding which ones to pursue and integrate into services is a major challenge A secondary problem is simply finding the time to consider the question Readers of Keeping Up with Emerging Technologies will learn all of the best practices and skills to keep up with new technologies and to analyze the ability of specific technologies to meet recognized user needs all in this single source You ll learn the best ways to gather information about new technologies and user needs to evaluate and analyze information to curate technology information for others to set up experiments and evaluate the results and to present your findings to persuade decision makers Written by the former head of user experience at MIT s library system this guidebook serves information professionals educators education technology specialists and anyone with emerging technology or innovation in their job titles It will also be useful for library administrators and those who manage these positions as well as for students seeking a technology oriented or curriculum design career path in libraries

Innovation for Value and Mission

Peet van Biljon,2022-09-20 Innovation No other concept is so widely celebrated yet so secretly dreaded The reason innovation requires managing through uncertainty This is hard for any organization whether private or public small or large This book provides a roadmap for those who want to understand and manage innovation in all its aspects It explains both the how and the why of innovation its economic and policy context as well as the techniques by which it can be orchestrated along with the management systems needed to govern it Innovation is uniquely presented through both a private sector value creating and public sector mission fulfilling lens Topics covered in context include modern innovation and creativity techniques such as design thinking and the Lean Startup the organizational challenges of innovation as well as innovation project and portfolio management techniques Business model innovation and

open innovation complete the picture from the manager's perspective. The private and public financing of R D startups and corporate innovation are presented contrasting the private and public worlds while explaining how they complement each other. Government innovation policy is discussed in its historical and contemporary context and the innovation policy toolset is introduced. Continual innovation is vital for companies and countries to prosper. Readers will learn why innovation must follow technological breakthroughs to raise productivity and economic growth and how innovation when done right can benefit larger society. An explanation for unequal growth that some companies, regions, and countries are not seeing the full productivity gains promised by modern technology is explored in the context of technology diffusion. No previous experience in innovation management, economics, or public policy is assumed and the book moves fast to equip the reader with practical tools and techniques. Innovation for Value and Mission is suitable for an introductory graduate level course or as a desk reference for experienced practitioners and policymakers. Because it connects multiple topic areas and contains ample additional references, the book is also a great resource for those with expertise in one particular area of innovation who desire to branch out into other areas.
