*Foundations of Insurance Economics* Georges Dionne, Scott E. Harrington, 2013-11-11

Economic and financial research on insurance markets has undergone dramatic growth since its infancy in the early 1960s

Our main objective in compiling this volume was to achieve a wider dissemination of key papers in this literature

Their significance is highlighted in the introduction which surveys major areas in insurance economics

While it was not possible to provide comprehensive coverage of insurance economics in this book these readings provide an essential foundation to those who desire to conduct research and teach in the field

In particular we hope that this compilation and our introduction will be useful to graduate students and to researchers in economics finance and insurance

Our criteria for selecting articles included significance representativeness pedagogical value and our desire to include theoretical and empirical work

While the focus of the applied papers is on property liability insurance they illustrate issues concepts and methods that are applicable in many areas of insurance

The S S Huebner Foundation for Insurance Education at the University of Pennsylvania's Wharton School made this book possible by financing publication costs
