

Major Amadeus airline reservation systems:

- Airline reservation systems (ARS) are platforms or applications that keep the carrier in contact with the passenger. It consists of a specific airline's flight schedule, fares, available reservations, and ticket check-in. In addition to data content, ARS interacts with and outputs relevant information to global distribution systems (GDS).
- In turn, they allow travel agencies and online portals with access to GDS consoles to offer real-time booking services to their customers. Most intermediaries take information and sell airline tickets, as well as hotel rooms, sea cruises, car rentals, bus and rail tickets, exactly through the largest GDSs.
- This accepts the travel agencies to offer the great deals, discounts and travel product information to the customers on flight booking at the best rates. The small travel agencies can also integrate GDS to their travel portal. Today, the travellers land on the travel portals to find the travel products for their pleasure or business trips to other destinations.
- This travel portal is one-point destination for the travellers to find air tickets, flights and car rentals and book them in advance to the trip. The GDS system led by Amadeus will let the customers of the travel agencies to have access to the inventory of the hotel with the current prices, discounts and type of rooms, facilities and tickets that are available in different airlines.
