Chatbots - how to master the marketing strategies of the big marketplaces

Digital World, 2024-04-02

Chatbots are computer programs designed to simulate human conversations. They are used in messaging apps, websites, and social networks to provide automated customer support, answer questions, and help people complete tasks. They are important because they allow companies to serve customers quickly and efficiently, 24 hours a day, 7 days a week. This can help improve customer satisfaction and increase customer loyalty. Additionally, chatbots can be programmed to perform specific tasks, schedule appointments, or make reservations, saving human employees time and effort. In this e-book, you will learn how to make the most of this technology and where, how, and why you can use chatbots in your personal or professional service to save time and attract more

users interact with your service in their own natural language Use free and open source tools along with Ruby to build
creative useful and unexpected interactions for users Take advantage of the Lita framework's step-by-step implementation
strategy to simplify bot development and testing From novices to experts chatbots are an area in which everyone can
participate Exercise your creativity by creating chatbot skills for communicating information and fun Developers of all skill
levels can craft user experiences that are natural easy to use and most of all fun Build chatbots using free open source tools
and launch them to popular chat platforms like Slack and Amazon's Alexa Use the Ruby programming language and the Lita
bot framework to unlock fun and powerful chat abilities such as sending text messages and emails creating new meme
images driving a robot around the room and talking out loud on a home speaker Use frameworks available in Ruby and Node
js to get started quickly Create simple chatbot skills that respond quickly to basic requests Chain skills together for more
complex interactions Take advantage of test-driven development techniques to build your bots with confidence Coordinate
tasks with colleagues via bot Connect with external APIs to provide users with data they need Extract data information from
web pages when an API isn't available Expand your bot's reach with SMS and e-mail messaging Deploy a chatbot to a host so
users can interact with it on their schedule Build a more responsive easy-to-use interface for your users today What You Need

You don't need much to get started with chatbots. A Mac or Linux computer with a recent version of Ruby is recommended. Windows users can keep up with a free virtual machine running Linux. You'll deploy your chatbots for free or at least cheaply on cloud hosting platforms like Heroku and Digital Ocean.
