Love, Money, and Parenting Matthias Doepke, Fabrizio Zilibotti, 2020-11-03 Doepke and Zilibotti investigate how economic forces shape how parents raise their children They show that in countries with increasing economic inequality such as the United States parents push harder to ensure their children have a path to security and success Economics has transformed the hands off parenting of the 1960s and 70s into a frantic overscheduled activity Growing inequality has also resulted in an increasing parenting gap between richer and poorer families raising the disturbing prospect of diminished social mobility and fewer opportunities for children from disadvantaged backgrounds The authors discuss how investments in early childhood development and the design of education systems factor into the parenting equation and how economics can help shape policies that will contribute to the ideal of equal opportunity for all From publisher description

A World Without Work Daniel Susskind, 2020-01-14 SHORTLISTED FOR THE FINANCIAL TIMES MCKINSEY 2020 BUSINESS BOOK OF THE YEAR One of Fortune Best Books of the Year One of Inc Best Business Books of the Year One of The Times UK Best Business Books of the Year A New York Times Book Review Editors Choice From an Oxford economist a visionary account of how technology will transform the world of work and what we should do about it From mechanical looms to the combustion engine to the first computers new technologies have always provoked panic about workers being replaced by machines For centuries such fears have been misplaced and many economists maintain that they remain so today But as Daniel Susskind demonstrates this time really is different Breakthroughs in artificial intelligence mean that all kinds of jobs are increasingly at risk Drawing on almost a decade of research in the field Susskind argues that machines no longer need to think like us in order to outperform us as was once widely believed As a result more and more tasks that used to be far beyond the capability of computers from diagnosing illnesses to drafting legal contracts from writing news reports to composing music are coming within their reach The threat of technological unemployment is now real This is not necessarily a bad thing Susskind emphasizes Technological progress could bring about unprecedented prosperity solving one of humanity's oldest problems how to make sure that everyone has enough to live on The challenges will be to distribute this prosperity fairly to constrain the burgeoning power of Big Tech and to provide meaning in a world where work is no longer the center of our lives Perceptive pragmatic and ultimately hopeful **A World Without Work** shows the way

Lawless Capitalism Steven A. Ramirez, 2014-06 In this innovative and exhaustive study Steven A Ramirez posits that the subprime mortgage crisis as well as the global macroeconomic catastrophe it spawned is traceable to a gross failure of law The rule of law must appropriately channel and constrain the exercise of economic and political power Used effectively it ensures that economic opportunity isn't limited to a small group of elites that enjoy growth at the expense of many particularly those in vulnerable economic situations In **Lawless Capitalism** Ramirez calls for the rule of law to displace crony capitalism Only through the rule of law he argues can capitalism be reconstructed
