Mitigation and Financing of Seismic Risks: Turkish and International Perspectives Paul R. Kleindorfer, Murat R. Sertel, 2012-12-06 Huge economic losses from natural disasters including nearly 100 000 fatalities world wide in 1999 alone gave rise to a renewed recognition by government industry and the public that national governments and international agencies cannot simply go on as they have in the past Changes in financial cover better enforcement procedures for building standards better business contingency planning and well developed emergency response were demanded from all sides In this volume an international group of experts present recent research on the variety of approaches adopted by different countries to assess natural hazard risks and the incentives for mitigating and financing them the particular focus being in earthquake risks The volume also presents an in depth summary of recent reforms in Turkey related to seismic risks with comparative research from many other countries Linkages are emphasised between science and engineering infrastructure insurance and risk management and public policy

Decision-Making Under Uncertainty George K. Chacko, 1991 In real life decision making situations it is necessary to make decisions with incomplete information for oftentimes uncertain results In Decision Making Under Uncertainty Dr Chacko applies his years of statistical research and experience to the analysis of twenty four real life decision making situations both those with few data points eg Cuban Missile Crisis and many data points eg aspirin for heart attack prevention These situations encompass decision making in a variety of business social and political physical and biological and military environments Though different all of these have one characteristic in common their outcomes are uncertain unknown and unknowable Chacko Demonstrates how the decision maker can reduce uncertainty by choosing probable outcomes using the statistical methods he introduces This detailed volume develops standard statistical concepts t x2 normal distribution ANOVA and the less familiar concepts logical probability subjective probability Bayesian Inference Penalty for Non Fulfillment Bluff Threats Matrix etc Chacko also offers a thorough discussion of the underlying theoretical principles The end of each chapter contains a set of questions three quarters of which focus on concepts formulation conclusion resource commitments and caveats only one quarter with computations Ideal for the practitioner the work is also designed to serve as the primary text for graduate or advanced undergraduate courses in statistics and decision science

Computer-Aided Decision Analysis Stuart S. Nagel, 1993-06-30 The essence of decision aiding software is that it consists of various forms of microcomputer programming designed to enable users to process a set of 1 goals to be achieved 2 alternatives available for achieving them and 3 relations between goals and alternatives in order to choose the best alternative combination allocation or predictive decision rule Benefits from using decision aiding software include 1 being more explicit about goals to be achieved alternatives available for achieving them and relations between goals and alternatives 2 being stimulated to think of more goals alternatives and relations than one would otherwise be likely to do 3 being prepared to handle multiple goals alternatives and relations without getting confused and without feeling the need to

resort to a single composite goal or a single go no go alternative 4 being encouraged to experiment with changes in the inputs into one's thinking to see how one's conclusions are affected and 5 being better able to achieve or exceed one's goals when choosing among alternatives or allocating scarce resources There are five parts to the book covering 1 a broad overview of decision aiding packages including criteria for evaluating them 2 approaches that are based on management science and operations research including linear programming and decision trees 3 spreadsheet based software generally with goals on the columns alternatives on the rows relations in the cells overall totals for each alternative at the far right and a capability for indicating how the totals would be altered as a result of changes in the inputs 4 expert systems software including rule based and knowledge based expert systems and 5 general applications of decision aiding software and a discussion of the increasing utilization of such software

The Rhetorical Turn Herbert W. Simons,2011-02-15 We have only recently started to challenge the notion that serious inquiry can be free of rhetoric that it can rely exclusively on hard fact and cold logic in support of its claims Increasingly scholars are shifting their attention from methods of proof to the heuristic methods of debate and discussion the art of rhetoric to examine how scholarly discourse is shaped by tropes and figures by the naming and framing of issues and by the need to adapt arguments to ends audiences and circumstances Herbert W Simons and the contributors to this important collection of essays provide impressive evidence that the new movement referred to as the rhetorical turn offers a rigorous way to look within and across the disciplines The Rhetorical Turn moves from biology to politics via excursions into the rhetorics of psychoanalysis decision science and conversational analysis Topics explored include how rhetorical invention guides scientific invention how rhetoric assists political judgment and how it integrates varying approaches to meta theory Concluding with four philosophical essays this volume of case studies demonstrates how the inventive and persuasive dimensions of scholarly discourse point the way to forms of argument appropriate to our postmodern age
