GNSS Receivers for Weak Signals Nesreen I. Ziedan,2006 Many important GPS applications require a GNSS global navigation satellite system receiver with the ability to work with weak signals This book addresses the critical issue introducing new efficient GNSS receiver algorithms designed for weak signals and various dynamic conditions **Cellular Communications** Nishith Tripathi,Jeffrey H. Reed,2014-09-12 Even as newer cellular technologies and standards emerge many of the fundamental principles and the components of the cellular network remain the same Presenting a simple yet comprehensive view of cellular communications technologies Cellular Communications provides an end to end perspective of cellular operations ranging from physical layer details to call set up and from the radio network to the core network This self contained source for practitioners and students represents a comprehensive survey of the fundamentals of cellular communications and the landscape of commercially deployed 2G and 3G technologies and provides a glimpse of emerging 4G technologies **Handbook of Dynamic System Modeling** Paul A. Fishwick,2007-06-01 The topic of dynamic models tends to be splintered across various disciplines making it difficult to uniformly study the subject Moreover the models have a variety of representations from traditional mathematical notations to diagrammatic and immersive depictions Collecting all of these expressions of dynamic models the Handbook of Dynamic Sy *Mathematics Catalog 2005* Neil Thomson,2004-10 *Handbook of Nondestructive Evaluation 4.0* Norbert Meyendorf,Nathan Ida,Ripudaman (Ripi) Singh,Johannes Vrana,2025-06-29 This handbook now as second edition continues to comprehensively cover the cutting edge trends and techniques essential for the integration of nondestructive evaluation NDE into the changing face of the modern industrial landscape In particular it delves into the marriage of NDE with new techniques in e g data mining and management cloud computing autonomous operation AI for data analysis and decision making as well as cyber security highlighting the potential for cyber physical controlled production and discussing the myriad possible applications across many different industries The Handbook of NDE 4 0 centers around the Industry 4 0 philosophy the next generation of industrial production encompassing all aspects of networking across all industrial areas It discusses the adaptation of existing NDE techniques to emerging new technological areas such as 3D printing via the introduction of cyber systems into the inspection and maintenance processes In addition the handbook covers topics such as the management and processing of big data with respect to real time monitoring of structural integrity and reliable inspection of individual components Remote NDE to include competence not available on site will be a potential technique to increase reliability of NDE inspections by integrating additional specialist inputs into the decision process by methods such as telepresence thereby better leveraging the scarce resources of senior inspectors into industrial inspections at multiple sites The handbook also includes non technical topics of direct relevance to leadership management and adoption of this new philosophy The handbook houses a wealth of essential information to help academics industry professionals regulatory bodies and entrepreneurs navigate through this burgeoning new field The

material in this handbook is presented with the intention of ultimately improving human safety through reliable inspections and dependable maintenance of critical infrastructure while also enhancing business value through reduced downtime affordable maintenance and talent optimization The content is positioned to inspire NDE professionals to think broadly in terms of their role as continuous value add rather than discrete decision support This second edition contains many new chapters and half of all chapters were revised from the 1st edition based on the engagement of authors through global platforms such as the ICDNT Specialist International Group on NDE 4.0 and the International conference series on NDE 4.0

Ontopolitics in the Anthropocene David Chandler, 2018-01-19 The Anthropocene captures more than a debate over how to address the problems of climate change and global warming Increasingly it is seen to signify the end of the modern condition itself and potentially to open up a new era of political possibilities This is the first book to look at the new forms of governance emerging in the epoch of the Anthropocene Forms of rule which seek to govern without the handrails of modernist assumptions of command and control from the top down taking on board new ontopolitical understandings of the need to govern on the grounds of non linearity complexity and entanglement The book is divided into three parts each focusing on a distinct mode or understanding of governance Mapping Sensing and Hacking Mapping looks at attempts to govern through designing adaptive interventions into processes of interaction Sensing considers ways of developing greater real time sensitivity to changes in relations often deploying new technologies of Big Data and the Internet of Things Hacking analyses the development of ways of becoming with working to recomposition and reassemble relations in new and creative forms This work will be of great interest to students and scholars of international politics international security and international relations theory and those interested in critical theory and the way this is impacted by contemporary developments
