Tectonics of the Deccan Large Igneous Province S. Mukherjee, A.A. Misra, G. Calvès, M. Nemčok, 2017-03-31 Understanding the Deccan Trap Large Igneous Province in western India is important for deciphering the India Seychelles rifting mechanism This book presents 13 studies that address the development of this province from diverse perspectives including field structural geology geochemistry analytical modelling geomorphology and geophysics e g palaeomagnetism gravity and magnetic anomalies and seismic imaging Together these papers indicate that the tectonics of Deccan is much more complicated than previously thought Key findings include the Deccan province can be divided into several blocks the existence of a rift induced palaeo slope constraints on the eruption period rift drift transition mechanisms determined for magma rich systems the tectonic role of the Deccan or R union plumes sub surface structures reported from boreholes the delineation of the crust mantle structure the documentation of sub surface tectonic boundaries post Deccan Trap basin inversion deformed dykes around Mumbai and also from the eastern part of the Deccan Traps documented in the field

Geoinformatics A. Krishna Sinha, 2006-01-01 The science of informatics in the broadest sense has been several

thousands of years in the making With the recent emergence of large storage devices and high speed processing of data it has become possible to organize vast amounts of data as digital products with ontologic tags and concepts for smart queries Coupling this computational capability with earth science data defines the emerging field of geoinformatics Since the science of geology was established several centuries ago observations led to conclusions that were integrative in concept and clearly had profound implications for the birth of geology As disciplinary information about Earth becomes more voluminous the use of geoinformatics will lead to integrative science based discoveries of new knowledge about planetary systems Twenty one research papers co authored by 96 researchers from both earth and computer sciences provide the first ever organized presentation of the science of informatics as it relates to geology Readers will readily recognize the vast intellectual content represented by these papers as they seek to address the core research goals of geoinformatics Publisher s website
