**Digital Maturity in Hospitals** Armin Scheuer,Jörg Studzinski,2025-04-11 This book serves as a comprehensive guide for hospitals embarking on a digital maturity journey offering actionable insights best practices and lessons learned from healthcare leaders worldwide It brings together contributions from over 50 world renowned digital health experts providing hospitals with the tools and strategies needed to successfully drive digital transformation to benefit both healthcare workers and patients Covering a broad range of topics the chapters delve into critical dimensions of hospital digitalization including digital maturity models IT capability interoperability governance patient centered care and advanced data analytics Readers will find real world case studies showcasing hospitals and governmental initiatives that have achieved externally validated success in their digital transformation efforts As emphasized in the Foreword written by the President of the International Diabetes Federation the book highlights the impact of digital maturity on patient care and explores forward looking trends that will shape the future of healthcare digitalization such as green IT ethical considerations social determinants of health and workforce development Whether you are a healthcare leader policy maker or practitioner this book offers valuable guidance and strategic insights to help you navigate your organization s digital maturity journey and drive excellence in healthcare delivery

**Deep Learning in Medical Signal and Image Processing** Aamir, Muhammad,Bhatti, Uzair Aslam,Rahman, Ziaur,Bhutto, Jameel Ahmed,Abro, Waheed Ahmed,2025-05-23 Deep learning is revolutionizing the analysis of medical signals and images offering unprecedented advancements in diagnostic accuracy and efficiency Techniques such as convolutional and recurrent neural networks are

transforming the processing of radiological scans ultrasound images and ECG readings By enabling more detailed and precise interpretations deep learning enhances the ability of healthcare providers to make timely and informed decisions These innovations are reshaping medical workflows improving patient outcomes and paving the way for a future of more reliable and efficient healthcare solutions Deep Learning in Medical Signal and Image Processing offers a comprehensive examination of deep learning specifically through convolutional neural networks CNNs and recurrent neural networks RNNs to medical data It explores the application of AI in the analysis of medical signals and images Covering topics such as diagnostic accuracy enhanced decision making and data augmentation techniques this book is an excellent resource for medical practitioners clinicians data scientists AI researchers healthcare professionals engineers professionals researchers scholars academicians and more

**The Harmonization and Protection of Trade Secrets in the EU** Jens Schovsbo, Timo Minssen, Thomas Riis, 2020-07-31 This book addresses the growing importance of trade secrets in today's society and business and the related increase in litigation media and scholarly attention using the new EU Trade Secrets Directive as a prism through which to discuss the complex legal issues involved Written by a team of international experts it discusses and analyses national implementation of the Directive and explores the effects of the new regime on contentious issues and crucial sectors such as big data and AI

Robotic Process Automation Christian Czarnecki, Peter Fettke, 2021-05-10 This book brings together experts from research and practice It includes the design of innovative Robot Process Automation RPA concepts the discussion of related research fields e.g. Artificial Intelligence AI the evaluation of existing software products and findings from real life implementation projects Similar to the substitution of physical work in manufacturing blue collar automation Robotic Process Automation tries to substitute intellectual work in office and administration processes with software robots white collar automation The starting point for the development of RPA was the observation that despite the use of process oriented enterprise systems such as ERP CRM and BPM systems additional manual activities are still indispensable today In the RPA approach these manual activities are learned and automated by software robots either by defining rules or by observing manual activities RPA is related to business process management machine learning and artificial intelligence Tools for RPA originated from dedicated stand alone software Today RPA functionalities are also integrated into elaborated process management suites From a conceptual perspective RPA can be structured into input components sensors in the wide sense an intelligence center and output components actuators in the wide sense From a strategic perspective the impact of RPA can be related to the support of existing tasks the complete substitution of human activities and the innovation of processes as well as business models At present high expectations are related to the use of RPA in the improvement of software supported business processes Manual activities are learned and automated by software robots that interact with existing applications via the presentation layer In combination with artificial intelligence AI as well as innovative interfaces e.g. voice recognition RPA creates a novel level of automation for office and administration processes
