**Freshwater Prawns** Michael Bernard New, Valenti, James H. Tidwell, Louis R. D'Abramo, Methil Narayanan Kutty, 2009-08-27 Covering general biology and every aspect of farming freshwater prawns from current research to development and commercial practice this has become widely viewed as a landmark publication in the field. The well known team of editors New, Valenti, Tidwell, D'Abramo and Kutty have gathered cutting edge contributions from the world's leading experts to provide farm personnel, business managers, researchers and invertebrate freshwater and crustacean biologists with an essential resource.

**Freshwater Prawn Farming** Michael B. New, 1982 This book has been prepared on the basis of Thai experience in the farming of the giant freshwater prawn *Macrobrachium rosenbergii*. It has a practical orientation as it was written for extension and fishery officers as well as for practising aquaculturists willing to start freshwater prawn farming. The farming of this prawn is of recent origin but is spreading very rapidly in several countries which followed the well divulged example of Hawaiian prawn farmers. At the time in which this manual was written Thailand had taken the world leadership in terms of production as the result of an active long term involvement of both the official and private sectors. Since there is already a great deal of mainly scientific literature on this species this manual was conceived to fill a gap in the existing literature in order to provide information on how to go about *M. rosenbergii* farming, answering the numerous requests from member Governments to FAO. It contains some general information on the biology of the species and much more detailed information on larval rearing and pond culture. The Thai practice forms the core of the manual but reference to other alternative techniques used elsewhere is given as well as additional literature reference relevant to each topic dealt with in the text for readers willing to enlarge their knowledge. Annexes on water filtration, nutrition of larvae, description of the various larval stages, ponds, feeds, seine set design, stock estimation and management strategy for continuous culture technique are also provided as well as a glossary of scientific and technical terms used in the main text.
