Minai develops the idea that an aesthetic value is not necessarily an objective value reasoned by rationality Beauty is a matter of chance and necessity in the nature of things a matter of the order of things and the circumstances of their interconnections or predictable and unpredictable forces To know such a complex system we need to establish a view of phenomenology and hermeneutics a world view where bad and good and ugly and beautiful are part of a continuum of changes and differences In that world view it is essential to have an understanding of mind nature and the epistemology of

knowing *Times of the Trinity* Duane Howard Larson, 1995 After Einstein it can neither be said that time is absolute nor that eternity is timeless Indeed contemporary physics may suggest that eternity is the fullness of times Because much Christian thought still adheres to an absolute time and a timeless eternity it is all the more opaque to the emerging non mechanistic scientific worldview After reviewing theological notions of time and eternity relativity theory quantum theory and three noted cosmologists this study shows how Christian theology s revisiting of its doctrine of the Trinity can lead to a fruitful consonance with the natural sciences *The Ontology of Science* John Worrall, 1994 In this work the problem of scientific ontology is applied to the general issue of scientific realism In addition particular ontological issues raised by particular theories or fields are explored **The New Gravity** Kenneth G.
