Daf Xf95:

TRANSBALTICA XIII: Transportation Science and Technology Olegas Prentkovskis, Irina Yatskiv (Jackiva), Paulius Skačkauskas, Pavlo Maruschak, Mykola Karpenko, 2023-02-21 This book reports on innovative research and developments in the broad field of transportation. It covers solutions relating to intelligent vehicles and infrastructure energy and combustion management vehicle dynamics and engineering as well as research on railway transport aerospace technologies logistics and security. Contributions are based on peer reviewed papers presented at the 13th international scientific conference Transbaltica Transportation Science and Technology held on September 15-16 2022 at Vilnius Gediminas Technical University in Vilnius Lithuania. All in all this book offers extensive information on modern transport systems with a good balance of theory and practice.

The Aerodynamics of Heavy Vehicles II: Trucks, Buses, and Trains Fred Browand, Rose McCallen, James Ross, 2008-09-30 It is our pleasure to present these proceedings for The Aerodynamics of Heavy Vehicles II Trucks Buses and Trains International Conference held in Lake Tahoe California August 26-31 2007 by Engineering Conferences International (ECI). Brought together were the world's leading scientists and engineers from industry universities and research laboratories including truck and high speed train manufacturers and operators. All were gathered to discuss computer simulation and experimental techniques to be applied for the design of the more efficient trucks buses and high speed trains required in future years. This was the second conference in the series. The focus of the first conference in 2002 was the interplay between computations and experiment in minimizing aerodynamic drag. The present proceedings from the 2007 conference address the development and application of advanced aerodynamic simulation and experimental methods for state of the art analysis and design as well as the development of new ideas and trends holding promise for the coming 10 year time span. Also included are studies of heavy vehicle aerodynamic tractor and trailer add on vices studies of schemes to delay undesirable flow separation and studies of derhood thermal management.

Working Scottish Trucks: Through the Lens Ian Lawson, 2017-08-07 Working Scottish Trucks is a photographic book bringing together 262 images of commercial vehicles spotted across some of the most scenic parts of Scotland. The beautiful landscapes offer a fantastic backdrop to the large range of haulage companies based in this rural rugged and often difficult area. With just one picture per page this book reproduces Ian Lawson's perfectly captured shots to maximum effect. The images have been taken over 30 years of dedicated viewing and focus on 10 types of vehicles: bulk transport curtainsiders fridges and food general haulage hay and straw heavy haulage livestock transporters renewable energy transport round timber haulage and tankers. Each photo is captioned with the date location make and model of vehicle and details of owner and types of work undertaken. The distinctive and unashamedly patriotic look of Scottish liveries has always attracted a strong following and so Working Scottish Trucks is a must have for transport enthusiasts within Scotland the UK and beyond.
