The terms travel and tourism are often used interchangeably in tourism literature. This comprehensive textbook provides students with essential knowledge of the intricate relationship existing between travel, transport and tourism. The book analyses the structure, functions, activities, strategies and practices of each of the sectors in the travel industry such as airlines, airports, tour operators, travel agencies and cruises. It is structured into six parts covering all modes of transport: air, land and water travel, intermediation, the tour operation, business and impacts and prospects for the future. International case studies are integrated throughout to showcase practical realities and challenges in the travel industry and to aid students' learning and understanding. Written in an accessible and engaging style, this is an invaluable resource for students of tourism, hospitality, transport and travel management courses.      The Coach on the Leisure Travel Market Martin
