

DISCOURSE ANALYSIS

Discourse analysis is an approach to the study of language that demonstrates how language shapes reality and reveal dominant ways of thinking an acting.

OVERVIEW

Discourse analysis involves the examination of how the 'ways of speaking about things' normalizes and privileges some frames of thinking about things while marginalizing others.

As a simple example, if movies consistently frame the ideal female as passive, silent, and submissive, then this becomes normalized in the "dominant discourse" of gender.

EXAMPLE

Studying Government Policies: A discourse analysis of policy texts would involve looking at the keywords, metaphors, and phrases used in the text and how they reveal ideological frameworks and viewpoints of the government of the day. These sorts of studies often demonstrate how the language of policy texts normalizes some behaviors and marginalizes others.

Discourse And Practice:

Discourse and Practice Theo van Leeuwen, 2008-05-01 Adding a new introduction and two previously unpublished papers *Discourse and Practice New Tools for Critical Discourse Analysis* brings together van Leeuwen's methodological work on discourse analysis of the last 15 years. Discourse van Leeuwen argues is a resource for representation a knowledge about some aspect of reality which can be drawn upon when that aspect of reality has to be represented a framework for making sense of things. And they are plural. There can be different discourses different ways of making sense of the same aspect of reality that serve different interests and will therefore be used in different social contexts. However abstract some discourses are discourses ultimately always represent doings van Leeuwen argues. Doing is the foundation of knowing and social practices are the foundation of discourses. Studying children's books newspaper reports brochures and other texts as well as photographs and children's toys van Leeuwen investigates what can happen when practices are transformed into discourses and provides analytical tools for reconstructing discourses from texts. Throughout the book van Leeuwen makes connections between sociological and linguistic or semiotic concepts and methods to ensure the social and critical relevance of his analytical categories. van Leeuwen's work has already been widely used by critical discourse analysts across the world. This volume will be a welcome guide for anyone looking for a form of discourse analysis that is both explicit and methodical and critically incisive.

Moral Discourse and Practice Stephen L. Darwall, Peter Railton, Allan Gibbard, 1997 Mediated Discourse Ron Scollon, 2002-09-26 *Mediated Discourse The Nexus of Practice* sets out a discursive theory of human action. Language and action are intimately related. The difficult question to answer is how they are related. Mediated Discourse Theory looks into social relationships to see how the use of language is both a form of action in itself and is also indirectly related to all other forms of human action. Through the empirical study of a one year old child learning to exchange objects with caregivers Scollon challenges the commonly held claim that all practices are represented in discourse and that all discourse has the function of structuring practice. Calling upon work in interactional sociolinguistics critical discourse analysis anthropological linguistics sociocultural psychology and intercultural communication the Mediated Discourse Theory set out in this book resolves current problematic issues such as how practices are learned across the boundaries of groups and how individuals come to be socialized as social actors.

Discourse Theory and Practice Margaret Wetherell, Stephanie Taylor, Simeon J Yates, 2001-05-25 A highly effective introduction to the range of approaches found in discourse analysis a lively and intellectually stimulating Reader. David Silverman Goldsmith College University of London *Discourse Theory and Practice* is much more than a collection of key classic articles and papers in the field of discourse analysis. The aim of the book is to introduce students to the major figures in the field and to some of their writings which combined with the interspersed editorial commentaries should allow students to understand the key epistemological and methodological issues of discourse theory and practice. The Reader is organized into four coherent parts namely Foundations and Building Blocks

Social Interaction Minds Selves and Sense Making and Culture and Social Relations Key readings include works by Stuart Hall Jonathan Potter David Silverman Erving Goffman Teun van Dijk Derek Edwards and Michael Billig Chapters introduce the student to each individual and their reading contextualizing each in terms of their contribution to the field theoretical standpoint and individual method of doing discourse analysis The many didactic elements of the book make it ideal as an introduction to the study of discourse for all students of psychology sociology linguistics or cultural studies This book is a course reader for The Open University course Discourse Analysis D843

Exploring Discourse Practices in Romanian Andra Vasilescu, Mihaela-Viorica Constantinescu, Gabriela Stoica, Jonathan Russell White, 2020-04-02 Exploring Discourse Practices in Romanian is a glimpse into Romanians style of interaction which has developed eclectically at the crossroads of Eastern and Western cultures It is oriented towards modern literacy while being deeply rooted in a long oral tradition and paradoxically displays both attachment to local specifics and commitment to mimetic speech and action s imported from various cultural spaces The book presents a characterisation of the Romanian cultural space in terms of various discourse practices drawing on recent challenging theoretical proposals and concluding with in depth corpus based analyses The chapters focus on five main topics the co construction of discursive identities discursive polyphony textualisation of attitudes and emotions conceptual metaphors and grammaticalisation of context explored in various discourse genres political discourse media discourse professional discourse face to face conversation literature of memoirs and the usage of Romanian by non natives The theoretical framework utilised here is discourse analysis defined in a broad sense with regards to discourse patterns pragmatic phenomena conversation analysis and rhetoric The volume having both a theoretical and an applied dimension will appeal to an international readership including researchers interested in current developments of pragmatics and discourse analysis

Discourse : Event : Practice Franka Schäfer, 2025-10-14 With Discourse Event Practice the

author presents a dynamic theoretical program for a discourse theoretically informed sociology of practice oriented toward the concept of the event She outlines the sociological relationship between the concepts of discourse event and practice diagnoses their distorted relationship and explains the dynamization of dichotomous conceptions as the guiding principle of her argumentation Through a reconstruction of the discourse theoretical foundations the practical theoretical conditions the situation of the method discussion and the starting point of sociological protest research she forms the basis of the research program and marks the question of the association of discourses and practices as a gap which is elucidated using the example of protest research The core of the book is a nuanced examination of the concept of event developed from the influence of Foucault as a primary basis for transformation and translated into a concept of event that ensures a relationship between discourse and practice that overcomes dichotomies within a post structuralist materialism In addition the potential of the program lies in the expansion of practice studies to include an explicit perspective on power and domination illustrated through an analysis of the practices of resistance as exemplified by the Yippie Festival of Life

Sense of Complexity in Projects Steve Raue, 2024-11-25 This book explores project management PM from a new perspective Project management is facing a paradigmatic stalemate Its major challenge is complexity Its current paradigmatic foundation in first order cybernetics has reached its limits More tools are created and project management is applied to any potential context expecting better results while doing more of the same Beyond conventional project management agile and other project management approaches have emerged as new options to answer the complexity challenge Yet the question remains whether new options and more tools in light of the current shortcomings can create enough momentum for project management as a whole to overcome its paradigmatic stalemate and evolve toward new paradigms based on second order cybernetics This book will embark on a journey to explore current paradigms in project management and argue why an analysis of discourse practices in project management may be critical to generating new paradigmatic perspectives The aim of this book is to provide an alternative perspective on projects as discourses and project management as a means to observe and conduct these discourses Instead of defining what projects and project management are the approach is to look at what people talk about when doing projects and apply project management It will arrive at a picture of how discourses about project management are shaped and institutionalised through the sensemaking of individuals and selected communities in their specific project practice and how these discourses shape project management in turn It is argued that this self reinforcing circle leads to a certain solidification of project management paradigms which prove insufficient in dealing with project complexity However it will also be argued that project practitioners can utilise their self reflection and self description of these discourse conventions to obtain more meaningful project conversations and arrive at a unified and systemically integrated understanding of project management This book will be of particular relevance to those interested in current issues underlying project management More generally it will be a valuable resource for researchers of project management organisational studies and governance **Complicity in Discourse and Practice** Jef

Verschueren, 2021-07-19 It is commonplace to say that we are living in troubled times Liberal democracy is in crisis Academic freedom is seriously constrained The media offers less insight and analysis than could be expected given the proliferation of communication tools Based on decades of research into the social and ideological functioning of discourse

and with a focus on politics universities and the media Jef Verschueren offers an analysis of current practices asks whether we are all complicit and makes suggestions for what we can do Central to this book is the notion of derailed reflexivity referring to the observation that politics institutions and news reporting tend to be excessively aimed at public opinion impression management and clicks to the detriment of policies addressing social justice issues high quality service and media content Highlighting that education is the cornerstone for democratic choices and ensures that we can critically assess media content this book shows that shared responsibility can be a source of hope and that everyone has the power to intervene Complicity in Discourse and Practice is a call to action for readers and a plea for actively minding the ecology of the public sphere

The Power of the Media in Health Communication Valentina Marinescu, Bianca Mitu, 2016-04-20 Health is a contested concept that has been defined in numerous ways The media is extremely powerful in promoting health beliefs and in creating role models for contemporary people The ways in which health is defined or understood can have wide ranging implications and can have an impact on issues such as health promotion or health literacy Health presentation in the media has a significant social impact because this type of message is important in changing people s beliefs attitudes and behaviours relating to health and in promoting health related knowledge among the target audience The present volume provides an interdisciplinary and multicultural contemporary approach to the controversial link between medicine and media The authors that have contributed to this volume analyse the media and medicine from different perspectives and different countries USA UK Portugal Turkey Taiwan Mexico Estonia Romania thus offering a re positioning of the study of media and medicine The new perspectives offered by this volume will be of interest to any health communication or media studies student or academic since they bring to light new ideas new methodologies and new results

Images of a Constitution William E. Conklin, 2024-07-01 Originally published in 1989 in this remarkable conjunction of constitutional theory jurisprudence literary theory constitutional law and political theory William Conklin first tells us what a constitution is not it is not a text nor a compendium of judicial and legislative decisions interpreting a text nor a set of doctrines nor moral political values nor customs nor a priori conceptions A constitution he argues is an image which exists through the legal consciousness of a community Using a wide range of Canadian judicial decisions as examples Conklin shows that the classic cases have been those where the boundaries of two conflicting images clashed In each instance the subject matter itself collapses into a search for a coherent image of what a constitution is all about The dominant image of a constitution in Canadian judicial discourse has been a rationalist one emanating from the Enlightenment understanding of knowledge Turning to academic writings on Canadian federalism law Conklin goes on to identify clearly the boundaries of three versions

of rationalism and to show that Canadian scholars have shared with judges the dominant image of rationalism In the third part of his essay the author makes a prescriptive claim namely that a text such as the Canadian Charter of Rights and Freedoms arguably raises issues which the rationalist image of a constitution precludes as legitimate inquiries He identifies a further general image of a constitution in Canadian legal discourse a teleological one which is rooted in the writings and judgments of Ivan Rand Finally he uses the contours of the Rand image to work out a further image of constitution an image that allows lawyers to entertain issues of both theory and social cultural practice thereby placing them in a position to alleviate the pain and suffering of those in need

Discourse and Practice Frank E. Reynolds, David Tracy, 1992-05-14
Discourse and Practice strives to stretch the boundaries of commonly accepted notions of philosophical discourse in order to introduce comparative considerations It is united by a concern to tease out the philosophical discourse and practices which inhere in seemingly unphilosophical texts These texts range from ethnographical materials to mythical and fictive narratives and finally to explicitly theoretical traditions Each author in attending to the details of his or her area study strives to demonstrate the implicit and explicit philosophical agendas at play The comparative examples offer valuable insights for how discourse can be redefined One consistent assumption presented here is that the element of practice which has long been posed in opposition to theory must be treated as an integral aspect of the philosophical import of any tradition Historical traditions covered include East Asia Papua New Guinea and Tibet as well as the more familiar territory of Western disciplinary fields

Language and Power Norman Fairclough, 1989 Examines how language functions in maintaining and changing power relations in modern society It discusses ways of analysing language which can reveal these processes how people can become more conscious of them and more able to resist and change them
