Energy-Efficient Computing and Data Centers Luigi Brochard,Vinod Kamath,Julita Corbalán,Scott Holland,Walter Mittelbach,Michael Ott,2019-08-06 Data centers consume roughly 1% of the total electricity demand while ICT as a whole consumes around 10% Demand is growing exponentially and left unchecked will grow to an estimated increase of 20% or more by 2030 This book covers the energy consumption and minimization of the different data center components when running real workloads taking into account the types of instructions executed by the servers It presents the different air and liquid cooled technologies for servers and data centers with some real examples including waste heat reuse through adsorption chillers as well as the hardware and software used to measure model and control energy It computes and compares the Power Usage Effectiveness and the Total Cost of Ownership of new and existing data centers with different cooling designs including free cooling and waste heat reuse leading to the Energy Reuse Effectiveness The book concludes by demonstrating how a well designed data center reusing waste heat to produce chilled water can reduce energy consumption by roughly 50% and how renewable energy can be used to create net zero energy data centers

International Taxation of Cloud Computing Alexander Weisser,2020-10-07 Cloud computing may be borderless but taxes are territorial It is easy to imagine how the two concepts can clash Much effort has gone into harmonizing tax rules across borders with the result that many jurisdictions have very similar tax rules Even so taxation remains a basic expression of national sovereignty The goal of this thesis is to examine how international tax law applies to the cross border cloud computing business Both multinational providers and customers of cloud computing services are analyzed Reflecting three traditional areas of international tax scholarship the goal could be stated in three questions Which jurisdictions have the right to tax What kinds of cloud computing transactions can be taxed What amount of the profit is taxable In more technical terms this means enquiring into how the use of cloud computing affects the permanent establishment status of taxpayers how the different kinds of cloud computing transactions are characterized under international double taxation treaties and how the calculation of taxable cloud computing profit is affected by transfer pricing In light of the current political events the thesis also offers recommendations de lege lata through a systematic approach Its first part assesses the current taxation of cloud computing The second part evaluates whether the findings of this initial assessment conform to various superior principles of good rulemaking It identifies which of the present tax rules ought to be adapted The final part considers how the rules could be amended to become more compliant with the superior principles In this way Part I embodies the thesis Part II the antithesis and Part III seeks a synthesis

Arbesman offers a fresh insightful field guide to living with complex technologies that defy human comprehension As technology grows more complex Arbesman argues its behavior mimics the vagaries of the natural world more than it conforms to a mathematical model If we are to survive and thrive in this new age we must abandon our need for governing principles and rules and accept the chaos By embracing and observing the freak accidents and flukes that disrupt our lives we can gain valuable clues about how our algorithms really work What s more we will become better thinkers scientists and innovators as a result Lucid and energizing this book is a vital new analysis of the world heralded as modern for anyone who wants to live wisely
