Grammaticalisation Paths of Have in English Andrzej M. Łęcki, 2010 This book explores the diachronic emergence of the verb have in English in its various grammatical uses The development of grammatical functions of have is analysed from pragmatic semantic morphosyntactic and phonetic angles Apart from the well known and formerly studied cases of the rise of perfect and obligative have the author describes the developments of the had better structure as well as causative have which have not received much

scholarly attention thus far He shows that the first examples of the fully grammaticalised constructions with have generally appear earlier than it is commonly believed He also offers possible motivations behind the growth of obligative and causative have This book proves that the changes leading to the rise of new grammatical constructions occur in a specific order pragmatic semantic changes precede morphosyntactic changes and phonetic reductions are the last to take place 'COME' and 'GO' off the Beaten Grammaticalization Path Maud Devos, Jenneke van der Wal, 2014-05-08 This edition brings together some lesser known grammaticalization paths travelled by come and go in familiar and less familiar languages No single book volume has been dedicated to the topic of grammatical targets different from tense and aspect so far This study will increase our insight in grammaticalization processes in general as they force us to rethink certain aspects of grammaticalization
