The Precocious Child in Victorian Literature and Culture Roisín Laing, 2024-05-06 This book examines representations of precocity in Victorian textual culture canonical literature children's fiction scientific texts and writing by children to argue that precocity challenges the idea of progress It considers how practitioners of literature and science from Wordsworth to Freud represented human development and the way in which Darwin's non progressive model of evolution troubled the existing model of progression by stages from childhood inexperience to adult maturity and understanding Roisín Laing argues that the precocious child undermines the equation of growth with progress and thereby facilitates other ways of imagining both individual and species development The idea represented by the precocious child in Victorian culture that the adult is not necessarily an improvement on the child the human not necessarily an improvement on the ape still troubles us today

Eternal Youth and the Myth of Deconstruction Bret Alderman, 2023-12-06 In *Eternal Youth and the Myth of Deconstruction* Bret Alderman puts forth a compelling thesis Deconstruction tells a mythic story Through an attentive examination of multiple texts and literary works he elucidates this story in psychological and philosophical terms Deconstruction the method of philosophical and literary analysis originated by Jacques Derrida arises from what Carl Jung called a kind of readiness to produce over and over again the same or similar mythical ideas In the case of deconstruction such ideas bear a striking resemblance to a figure that Jungian and Post Jungian writers refer to as the puer aeternus or eternal youth To make his case in addition to a careful analysis of numerous Derridean texts he offers readings of literary works by Milan Kundera J M Barrie Dante Apuleius and

others These texts help illustrate that deconstruction's preoccupations over questions of presence deferral authority limits time and representation are also recurrent issues for the eternal youth as described by Marie Louise Von Franz and James Hillman Judith Butler's deconstruction of sex and gender reflects similar patterns and she features in this work as a contemporary exemplar of the deconstructive approach Eternal Youth and the Myth of Deconstruction will be a compelling read for both students and teachers of depth psychology and continental philosophy The clarity of its style will be appealing to advanced scholars and educated laypersons alike *The American Hebrew*, 1925 *Unity*, 1920 *Normal Instructor and Primary Plans*, 1926 **Twenty Questions for the Writer** Jacqueline Berke, 1972 TWENTY QUESTIONS FOR A WRITER is structured around twenty questions most often used by writers for finding and developing their topics This basic structure creates a versatility that sheds light on the writing process *The Nation and Athenaeum*, 1926 *The Work-play Books ...Work Book ...* Arthur I. Winne, Nancy Ellen Perry, 2005-07 *Balancing Act* J P Hamish Kimmins, 2011-01-01 In the past decade there has been much debate over the environmental impact of forestry People are justifiably concerned about what is happening to the local and global forest environments but they are also confused by the polarized rhetoric that has characterized both sides of the debate In *Balancing Act* Hamish Kimmins calls for a balanced more objective approach to forestry issues in order to bridge the gap between the most extreme opponents in the debate He suggests that we need to begin with a common understanding of what forestry is about and how forest ecosystems work He outlines the scientific and ecological aspects of the major environmental issues facing British Columbia and the world today arguing that we need to disentangle the scientific from the value based social aspects of these questions He also contends that much of the current debate about forests and their management ignores the time dimension of ecosystems and he calls for a more dynamic view of current environmental issues in forestry one that accounts for change The first few chapters provide an outline of the basic principles of forestry and ecology and subsequent chapters discuss the major environmental issues facing forestry in the 1990s These include clearcutting slashburning management chemicals old growth biological diversity new forestry climate change acid rain the comparison between temperate and tropical forestry and long term decisions in forestry *Balancing Act* is essential reading for those who are searching for an objective accurate and readable evaluation of the issues at the heart of the forestry environment debate By emphasizing that forests are not static but change over time Kimmins adds an important often ignored dimension to the discussion Only by understanding all the intricacies of the ecosystems can we learn to manage our forests in a sustainable fashion **Industrial/organizational Psychology** Frank E.
