Rotor Dynamics held at CSIR NAL Bangalore and focuses on the latest trends in rotor dynamics and various challenges encountered in the design of rotating machinery The book is of interest to researchers from mechanical aerospace tribology and power industries engineering service providers and academics *Computational Methods in Nonlinear Structural and Solid Mechanics* Ahmed K. Noor,Harvey G. McComb,2014-05-20 Computational Methods in Nonlinear Structural and Solid Mechanics covers the proceedings of the Symposium on Computational Methods in Nonlinear Structural and Solid Mechanics The book covers the development of efficient discretization approaches advanced numerical methods improved programming techniques and applications of these developments to nonlinear analysis of structures and solids The chapters of the text are organized into 10 parts according to the issue they tackle The first part deals with nonlinear mathematical theories and formulation aspects while the second part covers computational strategies for nonlinear programs Part 3 deals with time integration and numerical solution of nonlinear algebraic equations while Part 4 discusses material characterization and nonlinear fracture mechanics and Part 5 tackles nonlinear interaction problems The sixth part discusses seismic response and nonlinear analysis of concrete structure and the seventh part tackles nonlinear problems for nuclear reactors Part 8 covers crash dynamics and impact problems while Part 9 deals with nonlinear problems of fibrous composites and advanced nonlinear applications The last part discusses computerized symbolic manipulation and nonlinear analysis software systems The book will be of great interest to numerical analysts computer scientists structural engineers and other professionals concerned with nonlinear structural and solid mechanics **Earthquake Disaster Simulation of Civil Infrastructures**

Xinzheng Lu,Hong Guan,2021-02-01 The first edition of this monograph presenting accurate and efficient simulations of seismic damage to buildings and cities has received significant attention from the research community To keep abreast of the rapid development in recent years our latest breakthrough achievements have been added to this new edition including novel resilient structural components secondary disaster simulations emergency responses and resilient recovery of communities after earthquake This edition comprehensively covers a range of numerical modeling approaches higher performance computation methods and high fidelity visualization techniques for earthquake disaster simulation of tall buildings and urban areas It also demonstrates successful engineering applications of the proposed methodologies to typical landmark projects e g Shanghai Tower and CITIC Tower two of the world s tallest buildings Beijing CBD and San Francisco Bay Area Reported in this edition are a collection of about 60 high impact journal publications which have already received high citations
