Product Stewardship in Action Helen Lewis,2017-09-08 Product Stewardship in Action describes how and why leading companies are taking responsibility for the environmental impact of their products and packaging Product stewardship often

referred to as extended producer responsibility or EPR is the idea that everyone that benefits commercially from a product including manufacturers distributors and retailers has a shared responsibility to minimize its environmental impacts Written primarily for a business audience it draws on the knowledge and experience of industry practitioners and other experts to provide a structured approach to product responsibility within firms This will help those new to the field as well as more experienced practitioners to develop an effective response to stakeholder concerns about the environmental impacts of their products and packaging Unlike other resources on product stewardship and EPR which tend to focus on the design or evaluation of public policy this book highlights the business case for action It argues that companies can achieve shared value both public and commercial value when they take a proactive and knowledge based approach to the life cycle management of their products Product Stewardship in Action focuses on product stewardship as an effective business strategy rather than a philanthropic exercise To be effective it needs to be based on a good understanding of product impacts and stakeholder concerns and the risks and opportunities that these present to the business The most effective responses will be those that address material issues in the product life cycle while supporting the achievement of other corporate goals and priorities

Fermented Milk and Dairy Products Anil Kumar Puniya,2015-08-18 This book examines all advanced areas of research on fermented milks and includes the most recent references available It covers the types of products based on fermentation pattern indigenous products the microbiological processes involved starter cultures involved in the production nutritional and functional aspects various health benefits associated with these products and quality assurance and future prospects All these issues linked to fermented milk and milk products are discussed in detail using a global perspective

Valuing Plastic Julie Raynaud,2014 The objective of this report is to help companies manage the opportunities and risks associated with plastic use It articulates the business case for companies to improve their measurement disclosure and management of plastic use in their designs operations and supply chains In order to provide a sense of scale the report sets out to quantify the physical impacts of plastic use translated into monetary terms This metric can be seen as the current value at risk to a company should these external impacts be realised internally through mechanisms like strengthened regulation loss of market share or increased price of raw materials and energy This metric can also be used to help understand the magnitude of the opportunities and the tangible benefits to stakeholders including shareholders of using plastic in an environmentally sustainable way
