Basic Rubber Testing Astm International:

Basic Rubber Testing , *Elastomer-Based Composite Materials* Nikolay Dishovsky, Mihail Mihaylov, 2018-05-15
Elastomer Based Composite Materials Mechanical Dynamic and Microwave Properties and Engineering Applications is focused on elastomer based composite materials comprising different types of reinforcing fillers The book provides an informative examination of the possibilities for broadening the engineering applications of elastomer composites through using various types of hybrid fillers ferrites and ceramics and also examines their synthesis and characterization It discusses new hybrid fillers that have been synthesized by different techniques e g impregnation of different substrates carbon black conductive carbon black activated carbons etc with silica or magnetite These new fillers have been thoroughly characterized by standard techniques and by up to date methods such as energy dispersive X ray spectroscopy in scanning transmission electron microscopy STEM EDX atomic absorption spectroscopy AAS and inductively coupled plasma optical emission spectroscopy ICP OES The effect of those fillers upon the curing properties mechanical and dynamic parameters electrical conductivity and dielectric and microwave characteristics of elastomer based composites is discussed in detail in this volume The book also covers the influence of various types of ceramics SiC B4C and TiB2 and barium and strontium hexaferrites upon the aforementioned properties of rubber composites in conjunction with a view toward solutions for environmental problems caused by waste tires The book shows that pyrolysis cum water vapor is a suitable and environmentally friendly method for the conversion of the waste green tires into useful carbon silica hybrid fillers The properties of elastomer based composites comprising different types of nanostructures fullerenes carbon nanotubes graphene nanoplatelets modified activated carbons and calcined kaolin are also discussed Special attention is paid to composites with lower levels of zinc oxide The volume provides an abundance of knowledge on the detailed characterization of these fillers and on the curing mechanical dynamic mechanical and dielectric and microwave properties of the elastomeric composites The book surveys the most recent research activities of the authors which will make it a vital reference source for scientists in both the academic and industrial sectors as well as for individuals who are interested in rubber materials It will be very useful for students especially PhD students scientists lecturers and engineers working or doing research in the field of polymer materials science elastomer based composites and nanocomposites and their engineering applications in the production of microwave absorbers and electromagnetic waves shielding materials materials for electronics devices and telecommunications

Tyre Retreading Bireswar Banerjee, 2019-04-01 This book describes the different elastomers utilized in tyre retreading Among others it discusses reinforcing fillers in terms of their efficacy the use of bonding agents and their relevance to the tyre retreading process The authors give specific guidelines for the practical compounding of different rubber compounds to make retread A practical approach is also taken to describing the manufacturing technology used in tyre retreading
