Designing Low Carbon Societies in Landscapes Nobukazu Nakagoshi,Jhonamie A. Mabuhay,2014-05-09 This book focuses on three major means of achieving a low carbon society conservation of the ecosystem complex changes of arrangement of landscapes and creation of biodiversity There are specific countermeasures to be taken for carbon absorption in the three types of landscapes urban cultural and natural because their carbon balances differ Urban landscapes are promising sites because they have the potential for greening and the creation of biodiversity Cultural landscapes in the tropics had not been actively researched until recently but this book now presents a collection of several cases focused on those areas Natural landscapes had existed in abundance in developing countries later nature protection areas were designated to coexist with development Now however developmental pressure has penetrated into those nature protection areas and landscape ecological projects are urgently required to preserve them As a result of global warming abnormal weather phenomena including super typhoons have occurred frequently in recent years The major underlying cause is the higher concentration of greenhouse gases released by human activities As well major natural absorbers of CO₂ such as forests wetlands and coral reefs are shrinking and the human impact is causing the ecological balance to deteriorate Controlling CO₂ emissions and expanding the CO₂ absorbers are keys to reducing total CO₂ Low carbon societies can be

established by maintaining the original CO2 balance through integration of multiple tools with contributions from diverse fields such as physics and chemistry physiology and humanities and education On the basis of an international consensus the environment must be protected no matter what sacrifices are required As this book demonstrates achieving a low carbon society is a top priority and landscape conservation is the first step in ecological research toward that goal Historical Dictionary of Utopianism James Matthew Morris, Andrea L. Kross, 2004 Major utopian literary works and dystopian novels are also profiled because they have fueled the fires of time honored arguments about the feasibility of creating a perfect society From the early theoreticians who proposed political innovations and those who sought equality among people to those who insisted on hierarchy under a supreme leader or god to those who had more practical economic social and ethical plans this reference enables the reader to explore the Western desire to improve the world and the lives of its people BOOK JACKET

Murphy, 2015-08-20 *Persuasive Aesthetic Ecocritical Praxis* continues Patrick D Murphy's focus on transversal ecocritical praxis by considering literature and cinema in terms of the persuasive force of aesthetic activity and whether or not artistic production and its criticism can be considered forms of activism Murphy argues that literature and other forms of aesthetic production hold out the promise of being able to move some individuals deeply through both affective and intellectual engagement in ways that facilitate ideological reflection To analyze aesthetic production ecocritically requires a transversal orientation in order to work continuously at accommodating a vast array of often seemingly disparate perspectives disciplines and contextual information as well as the ever changing thematic plot setting and contextual elements of the aesthetic works under consideration and the responses of changing audiences through time and across cultures Murphy demonstrates this approach through presenting theories of transversality and applying them with attention to issues of propaganda agitation and persuasion both in terms of artistic production and the criticism of such production He also brings an ecofeminist orientation to the fore with particular attention to the gendered economic aspects of environmental issues in an age of land grabs and plantation economies Along the way he treats a wide range of literary works films and miniseries In American literature he discusses realist and science fiction works from Susan Fenimore Cooper

s Rural Hours to Paolo Bacigalupi s The Windup Girl Barbara Kingsolver s Flight Behavior to Kim Stanley Robinson s 2312 and Ana Castillo s So Far from God to Leslie Marmon Silko s Gardens in the Dunes In international literature he analyzes Mo Yan s The Garlic Ballads Jiang Rong s Wolf Totem Michiko Ishimure s The Lake of Heaven Miyuki Miyabe s All She Was Worth and other novels The book concludes with a reading of Ernest Callenbach s Ecotopia and Ecotopia Emerging an Afterword recommending further directions for transversal ecocritical research an and interview that discusses Murphy s previous book Transversal Ecocritical Praxis and provides some personal background on the author *Ecological Concerns and Their Collective Realisation in Ernest Callenbach's "Ecotopia"* Katharina Eder, 2011-05 Seminar paper from the year 2010 in the subject English Language and Literature Studies Literature grade 2 University of Vienna language English abstract Ernest Callenbach s Ecotopia consists of the reports and diary entries of William Weston a reporter who is actually the first person to enter the newly modelled country consisting of Washington Oregon and Northern California which broke from the USA in 1980 Seen from 1974 the story is set 25 years in the future in the year of 1999 Ecotopian citizens are described as creative free thinking liberal and energetic people who place value on work in team configurations and social responsibility William Weston provides the reader with detailed insights into the Ecotopian lifestyle politics sexual freedom education and gender relations However the main focus of the book is on ecological aspects This essay is concerned with the ecological concerns and their collective realization in Ecotopia whereas emphasis will be put on Ecotopia s food circle food production and processing car less living television and wares Ecotopian economy their woods plastics and their way of generating energy from sun and sea Deutsch-englische Jahrbücher ,1991 *Future West* William Henry Katerberg, 2008 What is the future of the American West This book look at works of utopian dystopian and apocalyptic science fiction to show how narratives of the past and future powerfully shape our understanding of the present day West **Many Wests** David M. Wrobel, Michael C. Steiner, 1997 What does it mean to live in the West today Do people tend to identify with states with regions or with the larger West This book examines the development of regional identity in the American West demonstrating that it is a regionally diverse entity made up of many different wests Great Plains Southwest Rocky Mountains and more in which American regionalism finds its fullest expression These fourteen original essays tell how a sense of place emerged among residents of various regions and how a sense of those places was developed by people outside of them Wrobel and Steiner first offer a compelling overview of the West s regional nature then thirteen other rising or renowned scholars from history American Studies geography and literature tell how regional consciousness formed among inhabitants of particular regions All of the essays address the larger issue of the centrality of place in determining social and cultural forms and individual and collective identities Some focus on race and culture as the primary influences on regional consciousness while others emphasize environmental and economic factors or the influence of literature Some even examine western regionalism in areas that lie beyond the West as it has traditionally been conceived Each of the contributors believes that where a people

live helps determine what they are and they write not only about the many wests within the larger West but also about the constant state of flux in which regionalism exists Many books speak of the West as a place but few others deal with the West s different places Many Wests presents a vision of the West that reflects both the common heritage and unique character of each major subregion building on the revisionist impulse of the last decade to help redirect New Western History toward an appreciation of regional diversity and integrate scholarship in the regional subfields It is a book for everyone who lives in studies or loves the West for it confirms that it is home to very different peoples economies histories and regions **The Journal of the William Morris Society** ,2000 The Dark Side of the Left Richard J. Ellis,1998 Political correctness idealizing the oppressed and an affinity for authoritarian and charismatic leaders are all parts of what Ellis calls the dark side of the left **Counterculture Green** Andrew G. Kirk,2007 For many it was more than a publication it was a way of life The Whole Earth Catalog billed itself as Access to Tools and it grew from a Bay Area blip to a national phenomenon catering to hippies do it yourselfers and anyone interested in self sufficiency independent of mainstream America now known as living off the grid In recovering the history of the Catalog s unique brand of environmentalism historian Kirk recounts how Stewart Brand and the Point Foundation promoted a philosophy of pragmatic environmentalism that celebrated technological achievement human ingenuity and sustainable living Kirk shows us that Whole Earth was more than a mere counterculture fad At a time when many of these ideas were seen as heretical to a predominantly wilderness based movement it became a critical forum for environmental alternatives and a model for how complicated ecological ideas could be presented in a hopeful and even humorous way From publisher description
