Mathematical Methods for

Physics Farkhad G. Aliev, Antonio Lara, 2023-08-31 This book presents mathematical tools to solve partial differential equations typical of physical problems It explains in a detailed manner the process of solving the problems that typically arise in the context of physics Although there are a large number of textbooks on this topic few go so deep into the topic One of the original and unique features of this book is emphasis on the mathematical formulation of the problems as well as the analysis of several alternative ways to solve them Importantly the book provides a graphical analysis of the results when appropriate It describes a wide scope of the problems with detailed solutions and the methods involved ranging from cases in one to three dimensions from Cartesian to polar cylindrical and spherical coordinates and includes properties and applications of the Fourier transform to solve partial differential equations Directed Energy Weapons Bahman

Zohuri, 2016-08-29 This book delves deeply into the real world technologies behind the directed energy weapons that many believe exist only within the confines of science fiction On the contrary directed energy weapons such as high energy lasers are very real and this book provides a crash course in all the physical and mathematical concepts that make these weapons a reality Written to serve both scientists researching the physical phenomena of laser effects as well as engineers focusing on practical applications the author provides worked examples demonstrating issues such as how to solve for heat diffusion equation for different boundary and initial conditions Several sections are devoted to reviewing and dealing with solutions of diffusion equations utilizing the aid of the integral transform techniques Ultimately this book examines the state of the art in currently available high energy laser technologies and suggests future directions for accelerating practical applications in the field br div **Mathematics-I** Dr. E.
