1. Construct a bar graph for each target sheet. Label the horizontal axis as the area number (1-6) and the vertical axis for the number of hits. Space the bars evenly, making each the same width. Draw the height of each bar proportional to the number of hits in that area.
2. What area on each target sheet received the most hits?
3. Why don't all marbles dropped from a specified height land in the same spot? ( do not say "human error")
4. As the height of the drop increases, what happens to the probability of the marble landing in one of the lower numbered areas? How does this correspond with a change in energy level in an atom's electron?

**Implantable Medical Devices and Healthcare Affordability** Mark C. West, Michael Georgulis, Jr., 2023-03-16 The United States spends more than 17% of its GDP on healthcare while other developed countries average 8 7% of GDP on healthcare expenditures All this spending doesn't equate to value quality or performance however Among 11 high income countries the United States healthcare industry ranked last during the past seven years in four key performance categories administrative efficiency access to care equity and healthcare outcomes This book presents the implantable medical device IMD supply chain ecosystem as a microcosm of how these challenges of affordability and healthcare outcomes are created and are allowed to fester The IMD Spiderweb as the authors call it is exposed as an example of how a wide range of participants including physicians health system CEOs

group purchasing organizations health insurance companies and supply chain executives become ensnared in a web designed to benefit only one player Health systems in the United States pay as much as six times more for some IMDs than their counterparts do in Europe and prices for the same IMD model vary even among different U S hospitals While there is a fascination with the latest and greatest device there is also a shroud around visibility into how these products have performed and are likely to perform in patients The costs continue to rise not only in healthcare expenditures but also in death and disability The IMD Spiderweb is presented as a prime lesson in the challenges in healthcare affordability and outcomes that occur throughout the entire healthcare industry It is also put forward as an opportunity The story behind how these challenges arose and continue to be deepened by the current healthcare ecosystem also provides a foundation for solutions
