Trade and Jobs in Europe Mathias Dewatripont, André Sapir, Khalid Sekkat, 1999-08-05 In the last 25 years Europe has experienced a reduction in growth and an explosion in unemployment At a time when this and the continuing existence of the welfare state are top of the European agenda it has become increasingly popular to blame the globalization of the world economy for current problems This book provides the first comprehensive set of studies on the impact of trade with developing countries on the European labour market It argues that the evidence does not point to trade with developing countries as a major cause of European unemployment Instead technological change and domestic policy choices are the main causal factors As a result the contributors argue against protectionist trade policies whose benefits to employment would be limited at best but whose risk to world growth due to trade wars is immense The next ten years are a critical period for European integration and expansion Trade and Jobs in Europe will be of crucial importance to all those at the heart of the current debate advisers policy makers and researchers alike
