1996 Hui Zhang examines the purpose and technical specifics of each nuclear test and provides new details about China's
pursuit of warhead miniaturization Based on a number of new Chinese language sources that have not previously been
analyzed this book reveals that China has the ability to produce smaller lighter warheads than some have suggested as well
as more options for missiles that could carry a larger number of warheads The book also provides a new framework for
understanding China's efforts to modernize its nuclear arsenal and offers clues about the future of China's nuclear program
