Labour Law* Guy Davidov, Brian Langille, 2011-06-02 Labour law is widely considered to be in crisis by scholars of the field
This crisis has an obvious external dimension labour law is attacked for impeding efficiency flexibility and development
vilified for reducing employment and for favouring already well placed employees over less fortunate ones and discredited for
failing to cover the most vulnerable workers and workers in the informal sector These are just some of the external
challenges to labour law There is also an internal challenge as labour lawyers themselves increasingly question whether their
discipline is conceptually coherent relevant to the new empirical realities of the world of work and normatively salient in the
world as we now know it This book responds to such fundamental challenges by asking the most fundamental questions What
is labour law for How can it be justified And what are the normative premises on which reforms should be based There has
been growing interest in such questions in recent years In this volume the contributors seek to take this body of scholarship
seriously and also to move it forward Its aim is to provide if not answers which satisfy everyone intellectually nourishing food
